Supplementary Figures

Supplementary figure 1(a) Linear regression analysis of total copy number as a predictor of UCA concentration in tape-stripped stratum corneum samples, n=31
Supplementary figure 1(b) Linear regression analysis of total copy number as a predictor of histidine concentration in tape-stripped stratum corneum samples, n=22
Supplementary figure 1(c) Linear regression analysis of total copy number as a predictor of PCA concentration in tape-stripped stratum corneum samples, n=31
