Appendix

Introduction

The following inventory, which forms the basis of this study, is divided into three categories:

A. Bows (excluding cross-bows)
B. Arrowheads
C. Projectile points

Sequence

Within each category, objects are arranged firstly by alphabetical order of provenance (town and name where available or nearest location) and within that, by registration/identification number. Projectile heads, however, are arranged firstly by type, and within each type by provenance and registration/identification number. Each object is numbered, with a separate numbering sequence used within each category.

Layout

Inventory entries are set out in the following order: On the first line, in bold type, is the inventory number, the provenance, the registration/identification number and reference to any illustrations. On the second line, in italic type, are details of find circumstances (where available) followed, in the case of objects from archaeological excavations, by details of contextual dating. This is followed by the main description of the object; in the case of wooden objects (bow and arrowheads), the wood species is given on a separate line. After this are given the main dimensions of the object, and finally, published references (if any) to the object are listed.

Location of objects

Unless otherwise stated, all objects are exact at the time the inventory was prepared. However, since objects may have been moved, and the site may have been disturbed, the following information is given:

1. Original site
2. Site today
3. Find location

1. Original site

The site is located near the river in the town of [Name], [Country]. It is a large area with many artifacts found scattered throughout.

2. Site today

The site is located in the town of [Name], [Country]. It is a large area with many artifacts found scattered throughout.

3. Find location

The object was found at the site of [Name], [Country]. It was discovered during an archaeological excavation in [Year].
Introduction

The following Inventory of the archaeological material which forms the basis of this study is divided into three categories:

A. Bows (including crossbow nut)
B. Arrowshafts
C. Projectile heads

Sequence

Within each category, objects are arranged firstly by alphabetical order of provenance (townland name where available or nearest location) and within this, by registration/identification number. Projectile heads, however, are arranged firstly by type, and within each type by provenance and registration/identification number. Each object is numbered, with a separate numbering sequence used within each category.

Layout

Inventory entries are set out in the following order: On the first line, in bold type, is the Inventory number, the provenance\(^1\), the registration/identification number and reference to any illustrations. On the second line, in italic type, are details of find circumstances (where available) followed, in the case of objects from archaeological excavations, by details of contextual dating. This is followed by the main description of the object; in the case of wooden objects (bows and arrowshafts), the wood species is given on a separate line. After this are given the main dimensions of the object, and finally, published references (if any) to the object are listed.

Location of objects

Unless otherwise stated, all objects are part of the collections of the National Museum of Ireland (although much material from recent archaeological excavations is still in the care of the relevant excavators). Other collections are indicated by the following abbreviations on the first line of the Inventory entry:

<table>
<thead>
<tr>
<th>Abbreviation</th>

</tr>
<tr>
<td>UM</td>
<td>Ulster Museum, Belfast</td>
</tr>
</tbody>
</table>

\(^1\) Provenance is given as the town or townland name, followed by county; where the townland is not known, the nearest known location is given in inverted commas (e.g. "Cloverhill", Co. Monaghan).
Dimensions

All measurements are in millimetres (unless otherwise stated) and represent original or assumed original dimensions; measurements shown in brackets indicate incomplete dimensions. The following abbreviations are used:

L: Overall length of object.
E: Length of entry (distance from point to widest part of blade).
R: Length of run (distance from widest part of blade to stem or socket).
W: Maximum width of object.
T: Maximum thickness of object (for bows, thickness at point of maximum width).
S: Length of stem.
D: Maximum external diameter of socket.
Wt: Weight (in grammes).

Cir5, Cir10 (etc): Circumference at 5cm, 10cm (etc) from terminal.
MCir: Maximum circumference.
A. BOWS

1 Ballinderry, Co. Westmeath 1932:7252 Figs 33, 34, 36

Excavations at Ballinderry crannóg no. 1, 1932. Late 10th century.

Bow, almost complete but missing c.50mm from one end; intact terminal in poor condition but was apparently simply tapered, with a single rounded nock, 6mm wide and 5mm deep, on one side 19mm from the end; the bow is beginning to break 10.5mm from the end. No nock survives at the incomplete end. Present curvature of bow is reverse of the original, concave at the back and convex at the belly, although the ends are slightly recurved. Several knots are left standing proud on the back and facets produced by a paring/shaving tool are visible on the belly. Rough cord-like impressions, winding in spiral form around the back, one side and the belly between 89cm and 92cm from the intact end, may represent traces of a handle binding. Cross-section is roughly D-shaped, with rounded belly and flatter back, becoming more ovoid towards the ends; the sides of the bow have clearly been flattened. A clear sapwood/heartwood distinction is visible, with sapwood on the back.

Yew (Taxus baccata).

2 Cork, Co. Cork CPM E146:27157 Fig. 35

Bow fragment. Simple terminal, almost parallel-sided with abrupt flattened, slightly rounded end, which tapers in profile to a wedge shape, with a rough break at the other end; a single nock, probably triangular and up to 11mm deep but now broken, and sloping downwards from back to belly, occurs 55mm from the intact end. Cross-section is roughly D-shaped, but angular rather than curved; the back is slightly concave, while the belly has a prominent central ridge with angled facets on either side (two on the nock side, three on the other); the bow is quite straight in profile; no clear heartwood/sapwood distinction is visible.

Yew (Taxus baccata).

3 Cork, Co. Cork CPM E146:27212 Fig. 35
Excavations at Holy Trinity/Christchurch, 1977. Late 13th/early 14th century.
Bow fragment. Simple terminal tapering to a point with a jagged break at the other end; a single nock, probably triangular and 5mm deep but now broken, and sloping downwards from back to belly, is located 65mm from intact end. Cross-section is roughly rectangular, with relatively high, straight sides; in profile the bow tapers slightly toward the intact end, and bends towards the belly above the nock; a possible heartwood/sapwood distinction is visible, based on differential densities of growth rings, with more tightly spaced rings on the back.
Yew (Taxus baccata).

4 Dublin, Co. Dublin E43:1008 Fig. 34
Excavations at High St, 1962-63. Late 11th/early 12th century.
Possible bow fragment. Tapering, double concave terminal with a shattered break at the other end; no nocks are visible, but a definite stop ridge is cut around the back and sides, 68mm from the intact end. Cross-section near the broken end is a high D-shape, almost rectangular due to the high sides; the belly is on single flat plane throughout, whereas the back tapers markedly toward the terminal. No heartwood/sapwood distinction is visible.
Probably yew (Taxus baccata).

5 Dublin, Co. Dublin E71:1190 Fig. 35
Excavations at High St, 1967-72. Late 12th/early 13th century.
Bow fragment. Simple, flat ended terminal of bow with straight break at other end; a single nock, parallel-sided, 6mm wide and 4mm deep and sloping downwards from back to belly, is located 55mm from intact end; bow is gently tapered but narrows abruptly at nock and is almost parallel-sided for 42mm above nock, with a pair of very small triangular indentations, possibly secondary nocks, 9mm from the abrupt, flat end; a single perforation, 3mm in diameter, occurs in centre of bow, 17mm from end. Cross-section is shallow D-shape throughout, tapering toward the intact end, but the back is the convex face, while the belly is flat; the bow bends towards the belly above the nock; a clear heartwood/sapwood distinction is visible, with sapwood on the back.

Bow fragment. Finely carved terminal with a rough break at the other end, curved slightly off-centre; double parallel-sided nocks, 6mm wide and 4mm deep and sloping slightly downwards from back to belly, occur 49mm from the intact end; above this is a waisted, concave-sided section with a tapered end, 28mm long. Cross-section is roughly D-shaped and relatively shallow, with almost flat (slightly convex) back and sloping sides; an apparent heartwood/sapwood distinction is visible with sapwood (c. 5mm deep) on the back.

Dublin, Co. Dublin  E122:772  
Excavations at Christchurch Place, 1972-76.  Late 11th/early 12th century.
Bow fragment. Simple tapering terminal with straight break, possibly cut, at the other end; a single triangular nock, 7mm wide and 5mm deep and sloping slightly downwards from back to belly, occurs 73mm from the intact end and a single perforation, 2mm in diameter, occurs in the centre of the bow, 40mm from the intact end. Cross-section is a high D-shape with almost straight sides, tapering toward the intact end; a clear heartwood/sapwood distinction is visible, with sapwood on the back, which is the convex face, while the belly is almost flat.
Probably yew (*Taxus baccata*)

8  
Dublin, Co. Dublin  E122:12221  
Excavations at Christchurch Place, 1972-76.  11th/12th century.
Bow fragment. Simple terminal, almost parallel-sided for the most part but tapering to a point for the final 42mm, with a ragged break at the other end; double triangular nocks, 8mm wide and 4mm deep, occur 95mm from the intact end. Cross-section is sub-hexagonal, with straight, flat sides and convex, almost angled broad faces, and of almost uniform thickness throughout. Back and belly cannot be distinguished.

Bow fragment. Simple tapering terminal, ending in a rounded expansion, with a rough break at the other end; double triangular nocks (one damaged), 7mm wide and 4mm deep and sloping slightly downwards from ?back to ?belly, occur 83mm
from the intact end. Cross-section is a shallow D-shape, with a flat ?belly and convex ?back, of roughly uniform thickness throughout; a heartwood/sapwood distinction is visible, with a thin (2mm) layer of sapwood on the flat face (?belly). Yew (*Taxus baccata*).

10 Dublin, Co. Dublin E132:62239 Figs 35, 36

*Excavations at Wood Quay, 1974-76. 1st half 13th century.*

Complete bow, very short. The bow is straight and evenly tapered from the centre to the short, rounded terminals; one side is slightly damaged at the centre; double triangular nocks, 5-6mm wide and 3-4mm deep and sloping downwards from back to belly, are located 14mm and 16mm, respectively, from the ends; above these are smaller, secondary double nocks, also triangular and sloping from back to belly. Cross-section is a high D-shape, tapering in depth from the centre to the ends; a heartwood/ sapwood distinction is barely visible toward one end, with traces of sapwood on the back.

Yew (*Taxus baccata*).

11 Dublin, Co. Dublin E141:4447 Fig. 34

*Excavations at Wood Quay, 1974-76. Early 12th century.*

Bow fragment. Simple terminal, tapering to a point but very worn, with a ragged break at the other end; double rectangular nocks, 6mm wide and 2mm deep (one damaged), and sloping downwards from back to belly, occur 66mm from the intact end. Cross-section is a relatively shallow D-shape, of uniform thickness throughout, with convex back, flat or slightly concave belly and almost straight sides. No heartwood/sapwood distinction is visible.

12 Waterford, Co. Waterford E343:5258:8 Fig. 35

*Excavations at St Peter's church, 1986-87. Early to mid-13th century.*

Bow fragment with one intact end, tapered with flat, expanded terminal; single triangular nock occurs 55mm below terminal; bow slightly curved, following string, at end. Section is inverted D-shaped, with slightly convex belly and deeply convex back which joins belly in unbroken curve at one side while other side is cut to a flat edge. A possible heartwood/sapwood distinction, with sapwood on the back, was noted but could not be confirmed.

Yew (*Taxus baccata*).

13 Waterford, Co. Waterford E343:5367:29 Figs 34, 36
*Excavations at St Peter's church, 1986-87. Mid-12th century.*
Approximately half of bow with one intact end, with finely carved tongue-shaped terminal; large double triangular nocks occur 65mm below terminal; incised grid of 12 by 6 lines (17x8mm) occurs on belly, immediately below nocks; lower end of bow crudely hacked with knife or blade marks along belly; numerous knots on back, somewhat smoothed; bow very slightly curved, following string, throughout. Section is D-shaped, with slightly convex back and deeply convex belly which joins back in unbroken curve; more angled (gabled) above nocks. A probable heartwood/sapwood distinction, with sapwood on the back, was noted. Yew (*Taxus baccata*).

14 Waterford, Co. Waterford E343:5368:10 Fig. 34
*Excavations at St Peter's church, 1986-87. Mid-12th century.*
Bow fragment with one intact end with fan-shaped terminal; double triangular nocks occur 35mm below terminal; possible string marks between nocks; bow slightly curved, following string, at end. Section is shallow, inverted D-shaped, with slightly convex belly and deeply convex back which joins belly in unbroken curve at one side while other side seems to be cut to a flat edge. A probable heartwood/sapwood distinction, with sapwood on the back, was noted. Yew (*Taxus baccata*).

15 Waterford, Co. Waterford E406:1698:1 Figs 34, 36
*Excavations at Peter St/High St/Cook Lane, 1987-88. Mid-12th century.*
Approximately half of bow, in poor condition, with one intact end with tapered terminal; double triangular nocks occur 25mm below terminal; other end has been whittled for c.25cm, presumably for use as wattle; series of 13 short, straight cuts occurs on one side between 5cm and 14cm below terminal; bow slightly curved, probably following string, near terminal. Section indeterminate - D-shaped or sub-rectangular with slightly convex faces and flat sides; back and belly not certainly identified but slightly more convex face is probably the belly; sides get
deeper towards centre but back and belly maintain profile; lower end whittled to roughly round section. A probable heartwood/sapwood distinction was noted, but with sapwood on the face taken to be the belly.

Excavations at Peter St/High St/Cook Lane, 1987-88. Early/mid-13th century.
Bow, complete but broken near centre, with short, featureless terminal at one end and longer, slightly expanded terminal at other; single straight-sided nocks occur 72mm and 43mm, respectively, below terminals, set in opposite sides of bow; bow curves slightly, following string, c.20-25cm from each end, and strongly for final 6-8cm. Section D-shaped, with flat back and belly and convex sides; terminals are flat, sub-rectangular; belly decreases in width and sides become deeper and more convex as section thickens towards centre. No heartwood/sapwood distinction was visible.

Crossbow nut

19 Waterford, Co. Waterford E434:177:100 Fig. 41

Excavations at Olaf St, 1988. 12th/early 13th century.

Antler disc with a central perforation 5mm in diameter. Two straight-sided grooves are cut along the perimeter almost opposite one another; the longer is 48mm long, 8mm wide and up to 8mm deep but is only roughly carved and may be unfinished, while the shorter is 32mm long, 6.5mm wide and up to 8mm deep.

A perforation, 3mm in diameter, runs excentrically through the thickness of the disc between the two grooves. At one end of the shorter, finished perimeter groove a wide, rounded groove, 14.5mm wide and 7mm deep, is cut transversely across the perimeter of the disc.

B. Arrowshafts

1 Armagh, Co. Armagh EHS Fig. 29
_Excavations at Market St, 1975. Uncontexted._
Fragment of crossbow shaft, found complete with arrowhead (no. 831). Shaft 87mm long, exclusive of that part within the socket of the arrowhead; tapers from 13.5mm diameter immediately below the arrowhead to 8mm at the broken end; of round section throughout.
Wood species not identified.

2 Cork, Co. Cork CPM E146:30210 Fig. 43
_Excavations at Holy Trinity/Christchurch, 1977. 13th/mid-14th century._
Fragment of probable arrowshaft. Shaft 281mm long, roughly straight and parallel-sided; slightly thicker (8mm diameter) toward centre than at either end, but difficult to say whether this represents deliberate barelling; 11mm from one end the shaft abruptly narrows to 5mm diameter, but remains parallel-sided; of round section throughout.
Yew (Taxus baccata).

3 Cork, Co. Cork CPM E146:30211 Fig. 43
_Excavations at Holy Trinity/Christchurch, 1977. 13th/mid-14th century._
Doubtful fragment of arrowshaft. Shaft 360mm long, roughly straight, though now cracked and bent 9cm from one end, and parallel-sided, varying in diameter from 10-11mm; of round section throughout. Both ends worked; one end cut at an angle from one side to a wedge-shaped point 17mm long, the other end is cut to a short, abrupt, flat-topped faceted finish.
Yew (Taxus baccata).

4 Dublin, Co. Dublin E81:5857 Fig. 43
_Excavations at Winetavern St, 1969-72. Late 10th/early 11th century._
Fragment of arrowshaft, retaining socket of arrowhead (no. 839); shaft fragment is 215mm long, 8mm in maximum diameter and apparently parallel-sided, although some flattening and distortion has taken place.
Willow (Salix).
Excavations at Fishamble St, 1974-76. 11th century.

Complete arrow, found with arrowhead (no. 85). Shaft now in three pieces and is 53.9cm long (58.5cm including arrowhead); it is apparently barrelled, being rounded and 7mm in diameter near either end, but more oblong in cross-section, 10mm wide and 6mm deep in the middle, but this may be due to flattening and distortion in the middle. The nock end is also flattened, 10mm wide and 3.5mm deep. The shaft is self-nocked, the nock 5mm wide and 6mm deep; between 24mm and 142mm above the nock end are traces of adhesive residue, preserving the impression of a spiral wound binding and three longitudinal impressions, probably of the fletchings. A drawing made shortly after discovery seems to show a separate sleeve, presumably of wood, surrounding the tang of the arrowhead and inserted with it into the arrowshaft, but no trace this survives today.

Scots pine (*Pinus sylvestris*).

---

Excavations at St Peter's church, 1986-87. Late 12th/early 13th century.

Possible arrowshaft in two roughly straight, round-sectioned fragments. The longer fragment is broken at both ends and is 282mm long and c. 9mm in diameter throughout; the shorter fragment is broken at one end, is 102mm long and is also c. 9mm in diameter apart from the unbroken end, which tapers gradually over 18mm from 9mm to 4.5mm in diameter. The fragments do not join and are not definitely from the same piece. Each has been shaped by a knife, although a number of knots have been left unsmoothed.

Halpin, 'Archery material', p. 550; Fig. 15:28.8.

---

Excavations at St Peter's church, 1986-87. Mid-12th century.

Complete arrow found with arrowhead (no. 786). The arrowshaft disintegrated upon excavation, but was noted as 58cm in length, of which 2.5cm was inserted in the socket of the arrowhead; thus the length of the shaft exclusive of the arrowhead was 55.5cm and the entire arrow, inclusive of the arrowhead, was 60.5cm in overall length. The bowstring nock was noted at the base of the shaft. The shaft was rounded in cross-section and was described as tapering from c. 9mm in diameter at the top (i.e. nearest the arrowhead) to c. 4.5mm at the base; most probably this indicates a flattened nock end.

Wood species not identified, but apparently not yew.

Halpin, 'Archery material', p. 550; Fig. 15:28.9.
C. PROJECTILE HEADS

Type 1

Unless otherwise stated, all projectile heads can be taken to have blades of flattened lozenge/triangular section, straight stems of thick lozenge section, swelling towards the junction with the tang, and straight, tapering tangs of square section.

1 Dublin, Co. Dublin E43:15
   *Excavations at High St, 1962-63. Uncontexted.*
   Large projectile head. Shouldered blade, convex-sided, of stepped section near point, becoming flattened oval further down; beneath blade small pointed wings project perpendicular to blade, the tips recurved in opposite directions.

Dublin, Co. Dublin  E71:10776  Fig. 9
Excavations at High St, 1967-72.  Mid-11th century.
Finely forged shouldered blade, convex-sided with concave-sided run; entry of stepped section but run and adjacent parts of entry and stem are beaten flat into elongated lozenge-shaped panels of flattened hexagonal section.
L: 127  E: 50  R: 32  W: 17  T: 2  S: 18  Wt: 16

Dublin, Co. Dublin  E71:11106
Excavations at High St, 1967-72.  11th century.
Corroded (now conserved). Ragged, probably leaf-shaped blade, convex-sided with straight-sided run; relatively short stem of rounded/sub-rectangular section.
14 Dublin, Co. Dublin  E71:16684
*Excavations at High St, 1967-72. 11th century.*
Very corroded. Shouldered blade, convex-sided; tang very short, possibly incomplete.
L: (115)  E: 59  R: 10  W: 18  T: (5)  S: 34  Wt: 15

15 Dublin, Co. Dublin  E71:16920
Large projectile head, very corroded and obscured by concretion. Probably leaf-shaped blade on long, parallel-sided stem, both of indeterminate section; a smaller leaf-shaped blade, set perpendicularly to the first, occurs roughly midway along stem; base of stem and tang missing.
L: (137)  E: 43 (41)  R: 24  W: 23  T: (7)  S: (73)

16 Dublin, Co. Dublin  E71:19514  Fig. 9
*Excavations at High St, 1967-72. Late 10th/early 11th century.*
Leaf-shaped blade, convex-sided and slightly asymmetrical, on relatively short, parallel-sided stem.
L: 115  E: 36  R: 32  W: 17  T: 3  S: 19  Wt: 13

17 Dublin, Co. Dublin  E71:19660
*Excavations at High St, 1967-72. Late 10th/early 11th century.*
Large projectile head. Shouldered blade, straight-sided with long, slightly concave-sided run, point missing; stem of rectangular section near blade but thickens to rounded/square section at junction with tang.

18 Dublin, Co. Dublin  E81:1199
*Excavations at Winetavern St, 1969-72. Uncontexted.*
Large projectile head. Elongated leaf-shaped blade, now in two pieces; short stem.
L: 141  E: 47  R: 64  W: 15  T: 3 (5)  Wt: 17

19 Dublin, Co. Dublin  E81:5697  Fig. 7
*Excavations at Winetavern St, 1969-72. 11th century.*
Large projectile head. Leaf-shaped blade of stepped section, slightly bent; run and adjacent parts of entry and stem are beaten flat into elongated lozenge-shaped panels of flattened hexagonal section, thickening to thick lozenge section at base of stem.
L: 141  E: 45  R: 28  W: 18  T: 3  S: 43  Wt: 22
20 Dublin, Co. Dublin E81:6266
Excavations at Winetavern St, 1969-72. Late 10th/early 11th century.
Long leaf-shaped blade, now corroded, ragged and bent near base, probably of stepped section; tang very short and probably broken.
L: (137) E: 64 R: 22 W: 19 (18) T: 3 S: 39 Wt 16

21 Dublin, Co. Dublin E81:6301
Excavations at Winetavern St, 1969-72. Mid-10th century.
Shouldered blade, convex-sided with concave-sided run, probably of flattened hexagonal section; relatively short stem of rectangular section with marked, flat stop; base of tang missing.
L: (105) E: 52 R: 14 W: 19 T: 3 S: 24 Wt: 14

22 Dublin, Co. Dublin E122:108
Excavations at Christchurch Place, 1972-76. 4th quarter 11th century.
Shouldered blade, convex-sided with concave-sided run.
L: 92 E: 49 R: 4 W: 11 T: 4 S: 20 Wt: 8

23 Dublin, Co. Dublin E122:9305
Excavations at Christchurch Place, 1972-76. 12th century.
Not seen, but Finds Register illustrates shouldered blade, straight-sided with short concave-sided run; tang almost parallel-sided; unclear if stem is present.
L: 65

24 Dublin, Co. Dublin E122:11237
Excavations at Christchurch Place, 1972-76. Mid-11th century.
Very corroded. Short blade, probably leaf-shaped, missing point, on roughly parallel-sided stem of rounded/square section; only stump of tang survives.
L: (73) E: 25 (16) R: 14 W: 18 T: 4 S: 27

25 Dublin, Co. Dublin E122:13189
Excavations at Christchurch Place, 1972-76. 3rd quarter 11th century.
Large shouldered blade, convex-sided, with short concave-sided run; point missing; stem almost parallel-sided; traces of wooden shaft adhere to tang.
L: 99 (95) E: 53 (49) R: 10 W: 19 T: 3 S: 12 Wt: 10
Excavations at Christchurch Place, 1972-76. Late 11th century.
Very corroded. Probable shouldered blade, straight-sided, on relatively short, almost parallel-sided stem of thick rectangular section.
L: 114  E: 40  R: 33  W: 16  T: 3  S: 20  Wt: 9

Excavations at Christchurch Place, 1972-76. Mid-11th century.
Leaf-shaped blade on short, almost parallel-sided stem of rounded/rectangular section; tang very short, probably incomplete.
L: 86 (80)  E: 32  R: 24  W: 17  T: 3  S: 16  Wt: 9

Excavations at Christchurch Place, 1972-76. Mid-11th century.
Large projectile head. Shouldered blade, convex-sided with concave-sided run.
L: 142  E: 55  R: 13  W: 16  T: 3  S: 29  Wt: 18

Excavations at Christchurch Place, 1972-76. Mid-11th century.
Large projectile head. Long leaf-shaped blade of stepped section on a short stem, which tapers from blade to tang; only stump of tang survives
L: (139)  E: 59  R: 55  W: 19  T: 3  S: 15  Wt: 23

Excavations at Wood Quay, 1974-76. 1st half 13th century.
Long, narrow leaf-shaped blade, convex-sided with short, convex-sided run.
Excavations at Wood Quay, 1974-76. 1st half 13th century.

Shouldered blade, convex-sided with concave-sided run, of stepped section; long parallel-sided stem of flattened hexagonal section near blade, thickening to lozenge section towards tang.

Corroded. Shouldered blade, convex-sided, with short convex-sided run; no stem; relatively broad, tapering tang of rectangular section.
L: 81  E: 52  R: 4  W: 17  T: 3  Wt: 7

85 Dublin, Co. Dublin  E141:4373  
*Excavations at Fishamble St, 1974-76*. 11th century.
Arrowhead from complete arrow (no. 5). Small leaf-shaped blade; no stem.
L: 54  E: 16  R: 16  W: 12  T: 1  Wt: 2
Excavations at 5-12 High St, 1989. Late 12th century.

Leaf-shaped blade; no stem; long tang.
L: 119 E: 61 R: 19 W: 18 T: 4

Type 2

Unless otherwise stated, all projectile heads can be taken to have blades of flattened lozenge/triangular section and tapering sockets of rounded section.

Ardakillen, Co. Roscommon 1930:82

Found on one of the Ardakillen crannógs.

Corroded. Probably shouldered blade, convex-sided, with low shoulders, now ragged; parallel-sided socket, blocked with what seems to be corroded copper alloy.

Ardakillen, Co. Roscommon Wk.63; W.32; G356 Fig. 12

Found on one of the Ardakillen crannógs

Narrow shouldered blade, convex-sided, with low shoulders, of flattened oval section; socket of solid rectangular section immediately below blade, with possible forging seam visible on one side.
L: 124 E: 66 R: 8 W: 19 T: 3 D: 11 Wt: 19

Carnacavill, Co. Down EHS 83/81 Fig. 12

Small, leaf-shaped blade with ragged sides, of flattened oval section with an angular midrib.

Dollymount, Co. Dublin 1944:427 Fig. 12

Leaf-shaped blade, now assymetric due to uneven sharpening on one side; relatively long socket with forging seam visible on one side, defined by copper
92 Dublin, Co. Dublin E43:14 Fig. 12
Excavations at High St, 1962-63. Uncontexted.
Corroded (now conserved). Leaf-shaped blade with ragged sides and convex-sided run; of pointed oval section with a slight thickening at the centre; relatively long, large socket with forging seam visible on one side; base ragged and incomplete.
L: (102) E: 28 R: 10 W: 16 T: 4 D: (14) Wt: 22

93 Dublin, Co. Dublin E43:800
Excavations at High St, 1962-63. Mid/late 11th century.
Shouldered blade, straight-sided; socket displays forging seam on one side.
L: 75 E: 39 R: 11 W: 17 T: 2 D: 7 Wt: 7

94 Dublin, Co. Dublin E43:1485 Fig. 12
Shouldered blade, straight-sided (now ragged); narrow socket with forging seam visible on one side and nail hole 5mm above base, opposite seam; base broken.
L: 84 E: 46 R: 3 W: 13 T: 3 D: 8 Wt: 8

95 Dublin, Co. Dublin E71:2982
Excavations at High St, 1967-72. Late 11th/12th century.
Short, shouldered blade, sides ragged; socket almost parallel-sided, with forging seam visible on one side.
L: 51 (49) E: 20 (18) R: 7 W: 15 T: 2 D: 6 Wt: 5

96 Dublin, Co. Dublin E71:5779
Excavations at High St, 1967-72. 12th century.
Leaf-shaped blade; socket blocked with corrosion and/or traces of wooden shaft.
L: 69 E: 29 R: 15 W: 12 T: 3 D: 8 Wt: 5

97 Dublin, Co. Dublin E71:7362
Excavations at High St, 1967-72. 11th century.
Very corroded, now conserved. Probably shouldered blade with concave-sided run, bent 14mm below point; socket displays forging seam on one side; base ragged and incomplete.
L: (62) E: 34 R: 5 W: 19 T: 2 D: (7) Wt: 6
98 Dublin, Co. Dublin E71:7492

Excavations at High St, 1967-72. 11th century.
Narrow shouldered blade, straight-sided with concave-sided run, of lozenge section; only stump of socket survives.
L: (66) E: 49 R: 7 W: 7 T: 4 D: (4) Wt: 7

99 Dublin, Co. Dublin E71:7520

Excavations at High St, 1967-72. Uncontexted.
Corroded, now conserved but very ragged. Probably shouldered blade, bent near point; socket displays forging seam on one side; base ragged.
L: 70 E: 34 R: 4 W: 14 T: 2 D: 9 Wt: 6

100 Dublin, Co. Dublin E71:8049

Excavations at High St, 1967-72. 1st half 11th century.
Very corroded. Shouldered blade, convex-sided with convex-sided run; point bent, probably incomplete; socket almost parallel-sided, blocked with corrosion and/or traces of wooden shaft.

101 Dublin, Co. Dublin E71:8652

Excavations at High St, 1967-72. Late 10th/early 11th century.
Very corroded. Blade probably shouldered but now very ragged; socket open throughout, probably due to corrosion; blocked with traces of wooden shaft.
L: (67) E: (29) R: 12 W: (11) T: (2) D: 8 Wt: 6

102 Dublin, Co. Dublin E71:10709

Excavations at High St, 1967-72. Late 10th/11th century.
Very corroded. Outline and section of blade indeterminate; point missing; socket blocked with corrosion and/or traces of wooden shaft.

103 Dublin, Co. Dublin E71:10840

Excavations at High St, 1967-72. Late 10th/early 11th century.
Very corroded. Probably shouldered blade, straight-sided with convex-sided run, now ragged and missing point, of indeterminate section; socket blocked with corrosion and/or traces of wooden shaft.
L: 49 (39) E: 25 (15) R: 5 W: 13 T: (2) D: 8
104  Dublin, Co. Dublin  E71:15944
Excavations at High St, 1967-72. Late 12th century.
Shouldered blade, straight-sided with straight-sided run, point missing; only stump of socket survives.
L: (49)  E: 31 (29)  R: 8  W: 18  T: 3  Wt: (6)

105  Dublin, Co. Dublin  E71:16064
Excavations at High St, 1967-72. Late 12th century.
Very corroded. Shouldered blade, apparently convex-sided with straight-sided run, of indeterminate section; socket blocked with corrosion and/or traces of wooden shaft.

106  Dublin, Co. Dublin  E71:16437
Excavations at High St, 1967-72. Late 11th/early 12th century.
Corroded. Narrow leaf-shaped blade, slightly convex-sided with convex-sided run; relatively long socket, blocked with corrosion and/or traces of wooden shaft.
L: 79  E: 30  R: 8  W: 13  T: 3  D: 9  Wt: 6

107  Dublin, Co. Dublin  E71:19659
Excavations at High St, 1967-72. Late 10th/early 11th century.
Narrow leaf-shaped blade; socket blocked with corrosion and/or traces of wooden shaft.
L: 95  E: 45  R: 17  W: 13  T: 2  D: 9  Wt: 7

108  Dublin, Co. Dublin  E81:1522
Excavations at Winetavern St, 1969-72. 12th/early 13th century.
Very encrusted, apparently shouldered blade, straight-sided with concave-sided run; relatively long socket, blocked with corrosion and/or traces of wooden shaft; nearly half of circumference missing over lower 20mm.
L: 85  E: 30  R: 10  W: 11  T: 4  D: 11 (13)  Wt: 10

109  Dublin, Co. Dublin  E122:5854
Excavations at Christchurch Place, 1972-76. 4th quarter 11th century.
Short, shouldered blade, convex-sided with convex-sided run; relatively long socket with forging seam visible on one side; base ragged and incomplete.

110 Dublin, Co. Dublin E122:9166

Excavations at Christchurch Place, 1972-76. c.1100.
Leaf-shaped blade; socket blocked with corrosion and/or traces of wooden shaft.
L: 64 E: 24 R: 16 W: 14 T: 3 D: 8 Wt: 7

111 Dublin, Co. Dublin E122:10877

Excavations at Christchurch Place, 1972-76. Late 11th century.
Long, shouldered blade, straight-sided originally but now slightly concave, with concave-sided run; relatively long socket, very encrusted.
L: 123 E: 54 R: 12 W: 14 T: 3 D: 13

112 Dublin, Co. Dublin E122:11042

Excavations at Christchurch Place, 1972-76. Late 11th century.
Shouldered blade, concave-sided with concave-sided run; socket displays forging seam on one side.
L: 102 E: 53 R: 9 W: 15 T: 3 D: 10 Wt: 13

113 Dublin, Co. Dublin E122:14645

Excavations at Christchurch Place, 1972-76. Mid-11th century.
Shouldered blade, straight-sided with convex-sided run; base of socket ragged and incomplete.
L: (92) E: 50 (48) R: 9 W: 11 T: 3 D: (7) Wt: 9

114 Dublin, Co. Dublin E122:16011

Excavations at Christchurch Place, 1972-76. Mid-11th century.
Leaf-shaped blade, convex-sided with convex-sided run, now in two pieces; relatively short socket blocked with corrosion and/or traces of wooden shaft.
L: (65) E: 37 R: 11 W: 12 T: 3 D: (7) Wt: 5

115 Dublin, Co. Dublin E122:16286

Excavations at Christchurch Place, 1972-76. Late 11th century.
Shouldered blade, convex-sided with concave-sided run; socket displays forging seam on one side, open for 3mm above base.
L: 70 E: 39 R: 7 W: 18 T: 3 D: 12 Wt: 11

116 Dublin, Co. Dublin E122:16617

Excavations at Christchurch Place, 1972-76. 1st quarter 11th century.
Very corroded. Shouldered blade, convex-sided with straight-sided run; socket flattened, broken and blocked with corrosion and/or traces of wooden shaft.
L: (72) E: 37 R: 14 W: 17 T: 2 D: (8) Wt: 8
117 Dublin, Co. Dublin E141:2050
Excavations at Fishamble St, 1974-76.
Corroded. Shouldered blade, convex-sided with concave-sided run; section indeterminate; socket blocked with corrosion and/or traces of wooden shaft.
L: 69  E: 26  R: 8  W: 18  T: (6)  D: (11)

118 Dublin, Co. Dublin E141:2294
Excavations at Fishamble St, 1974-76. Uncontexted.
Shouldered blade, straight-sided with convex-sided run; point missing; narrow socket with forging seam visible on one side; base incomplete.

119 Dublin, Co. Dublin E141:5462
Excavations at Fishamble St, 1974-76. Uncontexted.
Leaf-shaped blade; relatively long, narrow socket, blocked with corrosion and/or traces of wooden shaft.
L: 69  E: 19  R: 17  W: 10  T: 2  D: 8  Wt: 5

120 Dublin, Co. Dublin E148:1135
Excavations at Fishamble St, 1975-76. 11th/12th century.
Extremely corroded. Probable leaf-shaped blade; only run and socket survive.
L: (58)  R: 30  W: (11)  T: 2  D: 9

121 Dublin, Co. Dublin E172:4044
Excavations at Fishamble St, 1977-80. 11th century.
Short, leaf-shaped blade, very ragged, of indeterminate section; relatively long socket, now open for most of its length; base incomplete.
L: (71)  E: 16  R: 19  W: 10 (7)  T: (4)  D: 11  Wt: 12

122 Dublin, Co. Dublin E172:9340  Fig. 12
Excavations at Fishamble St, 1977-80. c.1000.
Shouldered blade, straight-sided with straight-sided run; socket displays forging seam on one side and is open (possibly broken) near base.

123 Dublin, Co. Dublin E172:9666  Fig. 12
Excavations at Fishamble St, 1977-80. c.1000.
Probable shouldered blade, ragged; relatively long socket, blocked with corrosion and/or traces of wooden shaft, with forging seam visible on one side; base ragged.
L: 84  E: 33  R: 6  W: 14 (11)  T: 2  D: 10  Wt: 10
124 Dublin, Co. Dublin E172:10004 Fig. 12
Excavations at Fishamble St, 1977-80. Mid/late 11th century.
Leaf-shaped blade, convex-sided with concave-sided run; socket displays possible forging seam on one side; base slightly broken.
L: 80  E: 27  R: 18  W: 11  T: 2  D: 8  Wt: 7

125 Dublin, Co. Dublin E172:11600
Excavations at Fishamble St, 1977-80. c.1000.
Shouldered blade, convex-sided; socket slightly open throughout, with nail hole opposite seam, 8mm above base; base ragged.
L: (80)  E: 29 (27)  R: 17  W: 15  T: 2  D: 10  Wt: 11

126 Dublin, Co. Dublin E172:12124 Fig. 12
Excavations at Fishamble St, 1977-80. Early 11th century.
Shouldered blade, convex-sided with concave-sided run; socket slightly open for 15mm above base.
L: 93  E: 45  R: 12  W: 14  T: 3  D: 8  Wt: 9

127 Dublin, Co. Dublin E172:12230 Fig. 12
Excavations at Fishamble St, 1977-80. Late 10th century.
Long shouldered blade, straight-sided with concave-sided run but now slightly asymmetrical, probably due to resharpening; relatively short socket, blocked with corrosion and/or traces of wooden shaft, with forging seam visible on one side and a nail hole opposite seam near base.
L: 123  E: 76 (74)  R: 10  W: 16  T: 3  D: 8  Wt: 12

128 Dublin, Co. Dublin E172:12431
Excavations at Fishamble St, 1977-80. Late 10th century.
Probably leaf-shaped blade, now ragged, of flattened oval section; relatively long socket, blocked with corrosion and/or traces of wooden shaft; base ragged.
L: 70  E: 30  R: 8  W: 13  T: 1  D: 8  Wt: 5

129 Dublin, Co. Dublin E190:384
Excavations at Fishamble St, 1980-81. Uncontexted.
Shouldered blade, concave-sided with convex-sided run; socket tapers strongly, with forging seam visible on one side, open for 18mm above base, and possible nail hole opposite seam.
L: 96  E: 38  R: 13  W: 14  T: 3  D: 11  Wt: 10
130  **Dublin, Co. Dublin**  E190:771
*Excavations at Fishamble St, 1980-81. 1st half 11th century.*
Leaf-shaped blade with short, abrupt run; socket in two pieces, very corroded and blocked with corrosion and/or traces of wooden shaft.
L: 76  E: 30  R: 13  W: 18  T: 3  D: 10  Wt: 7

131  **Dublin, Co. Dublin**  E190:1901
*Excavations at Fishamble St, 1980-81. c.1000.*
Leaf-shaped blade of thin rectangular section, rather crude and possibly unfinished; socket displays forging seam on one side, broken for 10mm above base; section more squared than round.
L: 71  E: 16  R: 30  W: 9  T: 3  D: 10  Wt: 9

132  **Dublin, Co. Dublin**  E190:2647
*Excavations at Fishamble St, 1980-81. Early 11th century.*
Narrow, shouldered blade, straight-sided with straight-sided run; socket displays forging seam on one side; base ragged and incomplete.
L: 78  E: 37  R: 8  W: 11  T: 4  D: 9  Wt: 7

133  **Dublin, Co. Dublin**  E190:2913

Dublin, Co. Dublin  E81:5489
*Excavations at Winetavern St, 1969-72. 11th century.*
Very corroded. Blade concave-sided, probably of flattened oval section, with short basal barbs (one missing); stem of indeterminate section, concave-sided; tang relatively short.
L: 122   E: 59   R: 2   W: 19 (17)   T: 3   S: 32   Wt: 12
141 Dublin, Co. Dublin  E122:765  
Excavations at Christchurch Place, 1972-76.  Late 11th/early 12th century.  
Blade concave-sided, with short basal barbs; of flattened oval section; relatively long stem, almost parallel-sided; only stump of tang survives.  
L: 79 (69)  E: 35  W: 17  T: 3  S: 32  Wt: 7

142 Dublin, Co. Dublin  E122:14766  
Excavations at Christchurch Place, 1972-76.  Mid-11th century.  
Blade straight-sided with slight basal barbs, one missing; relatively long stem tapering from blade to stop, but thickening in section at stop.  
L: 98  E: 43  W: 20 (15)  T: 2  S: 30  Wt: 7

143 Dublin, Co. Dublin  E172:2022  
Excavations at Fishamble St, 1977-80.  Mid-/late 11th century.  
Blade straight-sided with slight basal barbs; a second blade, convex-sided and without barbs, occurs below the first and set perpendicularly to it; stem of lozenge section.  
L: 105  E: 28  W: 14 (13)  T: 2  S: 77  Wt: 10

144 Dublin, Co. Dublin  E172:9432  
Excavations at Fishamble St, 1977-80.  c.1000.  
Blade convex-sided with slight basal barbs, slightly bent at base; stem almost parallel-sided.  
L: 99  E: 37  W: 14  T: 3  S: 31  Wt: 8

Subtype 3A

145 Dublin, Co. Dublin  E122:9416  
Excavations at Christchurch Place, 1972-76.  11th century.  
Blade convex-sided, with long basal barbs (one missing), of flattened oval section with a low midrib; relatively long stem which expands evenly to stop.  

146 Dublin, Co. Dublin  E122:11710  
Excavations at Christchurch Place, 1972-76.  Uncontexted.  
Very corroded.  Blade straight-sided, with long, narrow basal barbs; stem of indeterminate section, probably parallel-sided; tang retains traces of wooden shaft with smooth rounded exterior, apparently original although only 5mm in diameter.  
L: 86  E: 38  W: 18 (17)  T: 3  S: 38  Wt: 7
147  Dublin, Co. Dublin  E122:13559
Excavations at Christchurch Place, 1972-76.  3rd quarter 11th century.
Blade straight-sided, with long, straight, tapering basal barbs; point and tip of one barb missing; stem of rounded section which expands evenly to stop; tang of rounded section.

148  Dublin, Co. Dublin  E122:15195
Excavations at Christchurch Place, 1972-76.  c. 1050.
Corroded, now conserved. Blade straight-sided, with long, straight basal barbs; relatively long stem of rectangular section, almost parallel-sided; tang probably broken.

149  Unprovenanced  UM  Fig. 14
Blade straight-sided, of flattened oval section, with long, straight, widely-splaying barbs, one of which is pointed while the other is almost parallel-sided; no stem.
L: 66  E: 52  R: 1  W: 40  T: 5

Type 4

Unless otherwise stated, all projectile heads can be taken to have triangular blades of flattened lozenge section and tapering sockets of rounded section.

150  Abbeypark, Co. Galway  E99:145
Excavations at Clontuskert priory, 1971-72  12th-16th century.
Corroded. Small blade, straight-sided, with slightly sloping run; base missing on one side; relatively long socket, containing traces of wooden shaft; possible forging seam visible.

162 Cloonsfinlough, Co. Roscommon  BM 1881.3-10.32

*Found on a crannóg, probably in 1852*

Corroded. Very small blade, convex-sided, with short, sloping run; of flat section with prominent angular midrib, continuing below blade as a raised 'tongue' of diamond section, ending abruptly 9mm below blade; relatively long socket displays a forging seam on one side and a pair of nail holes near fragmentary base.

163 Clough, Co. Down  UM

*Excavations at Clough castle, 1951-52. Early 13th century.*

Very corroded. Blade very ragged, probably convex-sided originally; of flat section with rounded midrib; socket very narrow, probably missing base.
164 Cork, Co. Cork CPM E146:3000 Fig. 16

239 Limerick, Co. Limerick  E534:1151
Excavations at King John's Castle, 1990. c.1175-1200.
Small blade, apparently convex-sided with sloping, concave run but now very ragged and missing point; probably of flattened oval section; socket relatively long.

240 Limerick, Co. Limerick  E534:1521
Excavations at King John's Castle, 1990. 13th century.
Very corroded. Probable small blade of flattened oval section; relatively long socket.

241 Limerick, Co. Limerick  E534:2571
Excavations at King John's Castle, 1990. 13th century.
Narrow blade, straight-sided with slight basal barbs; of flat section with rounded midrib; relatively long socket.

244 Lurgankee, Co. Louth  E55:183
*Excavations at Lurgankee motte, 1964. Late 12th/early 13th century.*
Very corroded. Large blade, probably convex-sided with pointed basal barbs (one missing); of flat section with rounded midrib; socket very fragmentary.
L: 84 (78)  E: 59 (54)  W: 20 (17)  T: 4  D: 10

245 Lurgankee, Co. Louth  E55:184
*Excavations at Lurgankee motte, 1964. Late 12th/early 13th century.*
Very corroded. Blade convex-sided and slightly assymetrical; of flat section with a central thickening or midrib; socket largely blocked with corrosion and/or traces of wooden shaft.

246 Newtown, Co. Wexford  E352:25
*Excavations at Ferrycarrig ringwork, 1986-87. Late 12th/early 13th century.*
Very corroded and encrusted. Blade straight-sided with slightly sloping run, missing point; of indeterminate section; socket probably incomplete.

247 Newtown, Co. Wexford  E352:236
*Excavations at Ferrycarrig ringwork, 1986-87. Late 12th/early 13th century.*
Corroded. Large blade, probably straight-sided, now ragged at base; relatively long socket.
L: 78  E: 44  W: 25 (21)  T: 4  D: 10
248 Newtown, Co. Wexford  E352:564
Excavations at Ferrycarrig ringwork, 1986-87. Late 12th/early 13th century. Corroded. Small blade, convex-sided but now rather misshapen; long socket, now in two pieces.
L: 77  E: 25  R: 2  W: 20  T: 3  D: 10

249 Newtown, Co. Wexford  E352:751
Excavations at Ferrycarrig ringwork, 1986-87. Late 12th/early 13th century. Corroded. Large blade, probably convex-sided and very slightly barbed at base; missing point and one barb; of thin pointed oval section with rounded midrib; relatively long socket, almost parallel-sided.
L: 80 (78)  E: 51 (49)  W: 24  T: 4  D: 10

250 Newtown, Co. Wexford  E352:761
Excavations at Ferrycarrig ringwork, 1986-87. Late 12th/early 13th century. Corroded and encrusted. Large blade, probably straight-sided and possibly slightly barbed at base, bent near point; only stump of socket remains.
L: (45)  E: 45  W: 25 (22)  T: 4

251 Newtown, Co. Wexford  E352:843
Excavations at Ferrycarrig ringwork, 1986-87. Late 12th/early 13th century. Corroded and encrusted. Large blade, straight-sided, with slightly concave base, of indeterminate section; relatively long socket, largely blocked with corrosion.
L: 78  E: 53  W: 24  T: 4  D: 10

252 Pollardstown, Co. Kildare  E98:7
Excavations at Pollardstown ringwork, 1971. Probably 13th/14th century. Very corroded. Large blade, now apparently concave-sided but probably straight-sided originally, slightly barbed; socket partly blocked with corrosion and/or traces of wooden shaft.

265 Trim, Co. Meath  95E77:133:8
Narrow blade, slightly convex-sided; tip of blade and one side of base damaged; of flat section with distinct angular midrib.
266 Trim, Co. Meath 95E77:133:143 Fig. 16

Very corroded. Probable triangular blade, convex-sided, with slight basal barbs, one missing; of indeterminate section; socket relatively long.

267 Trim, Co. Meath 95E77:443:1

Excavations at Trim castle, 1995-97. 1170's/1180's.

Large blade, slightly convex-sided; one side of base missing; probably of flat cross-section with a midrib.

268 Trim, Co. Meath 95E77:630:3

Blade convex-sided, damaged at point; of flattened oval cross-section; socket relatively long.

269 Trim, Co. Meath 95E77:1155:35

Blade convex-sided, point missing; socket missing.

270 Waterford, Co. Waterford E343:5276:12

Excavations at St Peter's church, 1986-87. Early 13th century.

Corroded. Blade rather shapeless but probably narrow triangular originally; probably of thin flattened oval section; socket relatively short.
L: 60   E: 47   W: 17 (13)   T: 4   D: 7

Halpin, 'Archery material', p. 542; Fig. 15:26.4.

271 Waterford, Co. Waterford E343:5369:61

Excavations at St Peter's church, 1986-87. Mid-12th century.

Blade almost straight-sided with concave base giving slight barbs; of flat section with low rounded midrib; socket relatively long, ragged at base.
L: 72   E: 45   W: 24   T: 3   D: 8

Halpin, 'Archery material', p. 542; Fig. 15:26.2.
272 Waterford, Co. Waterford E406:1183:2
Excavations at Peter St/High St/Cook Lane, 1987-88. Late 12th century.
Large blade, now shouldered but triangular originally, missing point and corners of base; of flat section with low rounded midrib; socket largely broken.
L: 103 (95)  E: 67 (61)  W: 30 (26)  T: 4  D: 11
Halpin, 'Archery material', p. 542; Fig. 15:26.9.

273 Waterford, Co. Waterford E434:167:1
Very corroded. Large blade, probably straight-sided and of flattened oval section; socket apparently parallel-sided, but obscured by corrosion.
Halpin, 'Archery material', p. 542; Fig. 15:26.8.

274 Waterford, Co. Waterford E435:1160:8
Excavations at Bakehouse Lane, 1988. Mid-12th century.

279 Unprovenanced BM 1867.7-20.4

Corroded. Very small blade, convex-sided with sloping run; socket relatively long, base fragmentary.
L: (61)  E: 20  R: 4  W: 8  T: 3  D: 8

280 Unprovenanced Wk.5; W.19; D321

Very corroded. Blade straight-sided with slight basal barbs; socket blocked with corrosion and/or remains of wooden shaft.
L: 61  E: 32  R: 2  W: 14  T: 3  D: 8  Wt: 5

281 Unprovenanced Wk.6; W.17

Corroded. Narrow blade, straight-sided with slightly concave base; socket retains traces of wooden shaft.

282 Unprovenanced Wk.8; W.16; D323

Fragmentary blade, probably large, convex-sided and slightly barbed at base; most of blade missing; socket displays possible forging seam along one side, partly blocked with corrosion.
L: 81 (53)  E: 52 (23)  R: 1  W: 22  T: 4  D: 8

283 Unprovenanced Wk.9

Large blade, almost straight-sided with slight basal barbs; of flat section with rounded midrib; socket displays traces of forging seam on one side and a very small nail hole near base.
L: 84  E: 55  R: 2  W: 23  T: 4  D: 8  Wt: 11

284 Unprovenanced Wk.10

Corroded. Large blade, straight-sided, with slightly concave base, missing on one side.
L: 78  E: 54  W: 24 (20)  T: 4  D: 8  Wt: 8
285 Unprovenanced Wk. 11
Corroded. Blade straight-sided with sloping run; of flattened oval section; relatively long socket, of sub-rectangular section near blade, with a possible forging seam along one side.
L: 76  E: 35  R: 5  W: 20  T: 3  D: 11  Wt: 13

286 Unprovenanced Wk. 38  Fig. 14
Very small blade, straight-sided with sloping run; of flat section with thick, angular midrib continuing below blade as a raised 'tongue' of diamond section, ending abruptly 5mm below blade; socket broken at base.

Probable Type 4 projectile points

287 Dublin, Co. Dublin  E71:386
Excavations at High St, 1967-72. Uncontexted.
Very corroded and fragmentary. Blade almost entirely missing; socket incomplete at base, blocked with corrosion and/or traces of wooden shaft.
L: (42)  E: (10)  W: (14)  T: 3  Wt: (3)

288 Dublin, Co. Dublin  E71:7742
Excavations at High St, 1967-72. 11th century.
Blade straight-sided with concave-sided run; only stump of socket (or tang) survives.
L: (55)  E: 43  R: 4  W: 24  T: 2  Wt: (7)

Subtype 4A
Unless otherwise stated, all projectile heads can be taken to have triangular blades of flattened lozenge section with long basal bars of triangular section and tapering sockets of rounded section.

289 "Agivey", Co. Derry  E92:556
Possibly from a ford in the river Bann.
Very corroded. Blade roughly straight-sided with long (36mm), parallel-sided basal bars, one broken; most of socket missing; one barb joined to socket at one point, probably due to corrosion.
L: 66  E: 66  W: 36  T: 4  D: (9)  Wt: 13
290 Ballyroney, Co. Down UM

Excavations at Ballyroney motte, 1953. 1st half 13th century.
Very corroded and fragmentary. Blade straight-sided and probably of flat section with rounded midrib; reconstructed by Waterman with slight, pointed barbs, but base of blade is clearly separated from the socket, indicating relatively long, straight barbs originally; most of socket missing.
L: (51)  E: (40)  W: (19)  T: 4 (7)  D: (9)
Waterman, 'Seafin castle and Ballyroney motte and bailey', p. 100; Fig. 11:5.

291 Bennekerry Co. Carlow 1971:1014

Found in a gravel pit during quarrying.
Blade roughly straight-sided, of flattened oval section, and asymmetrical, with parallel-sided basal barbs, one longer (16mm) and wider than the other (11mm long); socket blocked with corrosion and/or traces of wooden shaft.
L: 77  E: 55  W: (28)  T: 4  D: 10  Wt: 16

292 Carrickfergus, Co. Antrim UM CF1-580 Fig. 17

Corroded. Blade straight-sided, of flat section with rounded midrib, with long (9mm), roughly parallel-sided barbs, one broken; socket blocked with corrosion and/or traces of wooden shaft; a large hole near the base may be a nail hole.
L: 52  E: 41  W: 25 (23)  T: 7  D: 11

293 Carrickfergus, Co. Antrim UM CF1-653A Fig. 17

Very corroded. Blade originally straight-sided, now ragged, of flat section with low rounded midrib, and with long (9mm), parallel-sided barbs; socket almost parallel-sided, blocked with corrosion and/or traces of wooden shaft.
L: 53  E: 40  W: 20  T: 5  D: 9

294 Downpatrick, Co. Down EHS 87/1031 Fig. 17

Blade roughly straight-sided, missing point, with long (9mm), broad, parallel-sided basal barbs; relatively long socket, broken at base, with traces of copper alloy plating internally and externally.
L: 83 (71)  E: 52 (39)  W: 28  T: 5  D: 11
295 Dublin, Co. Dublin E71:1752
Excavations at High St, 1967-72. Uncontexted.
Corroded blade of indeterminate section with long (at least 19mm), parallel-sided basal barbs of triangular section (one broken); socket missing.

296 Dublin, Co. Dublin E71:2273
Excavations at High St, 1967-72. Late 12th/early 13th century.
Corroded. Blade straight-sided, of indeterminate section with long (22mm), parallel-sided basal barbs, probably of triangular section (one missing); socket blocked with corrosion and/or traces of wooden shaft.
L: 65 E: 58 W: 34 (22) T: 4 D: 10 Wt: 9

297 Dublin, Co. Dublin E71:9910
Blade convex-sided, of thin pointed oval section with long (15mm), almost parallel-sided basal barbs of triangular section; socket tapers strongly, largely broken on one side, base incomplete.
L: (56) E: 35 W: 18 (16) T: 1 D: 10 Wt: 5

298 Dublin, Co. Dublin E71:16297
Excavations at High St, 1967-72. Late 11th/early 12th century.
Blade straight-sided (slightly concave on one side), of flattened lozenge section, with long (up to 29mm), tapering basal barbs of triangular section; socket displays forging seam on one side.
L: 69 E: 68 W: 33 T: 2 D: 9 Wt: 9

299 Dublin, Co. Dublin E296:47556
Excavations at Dublin Castle, 1984-86. 13th/14th century.
Blade convex-sided, of flat section with rounded midrib, with long (10mm), broad, parallel-sided basal barbs, one broken; socket missing.
L: (44) E: 44 W: 33 (30) T: 2

300 Dublin, Co. Dublin E296:47558
Excavations at Dublin Castle, 1984-86. 13th/14th century.
Large blade, straight-sided but ragged, of flat section with rounded midrib, with long (22mm), broad basal barbs, one missing; socket missing.
L: (67) E: 67 W: 57 (49) T: 3
301 Near Strokestown, Co. Roscommon Wk.121
19th century find on one of the Strokestown crannógs.
Corroded. Blade straight-sided, with long (25mm), parallel-sided basal barbs, one missing; socket largely broken.
L: (70) E: 66 W: 30 (20) T: 6 D: 11 (9)

302 Trim, Co. Meath 95E77:207:23
Excavations at Trim castle, 1995-97. Late 13th/early 14th century.
Corroded. Blade convex-sided, of flattened oval cross-section, with long (11mm but originally longer), broad, parallel-sided barbs; most of socket missing.
L: 48 E: 39 W: 30 T: 5.

303 Waterford, Co. Waterford E435:1113:17
Blade straight-sided, of flattened oval section, with long (11mm), roughly parallel-sided basal barbs, one missing; socket of rounded section but rather flattened.

**Type 5**
Unless otherwise stated, all projectile heads can be taken to have small triangular blades of flattened lozenge or oval section on long, parallel-sided solid stems of rounded section.

320 Dublin, Co. Dublin   E43:1098  
*Excavations at High St, 1962-63. Late 12th/13th century.*
Blade ragged but apparently straight-sided with straight base; stem (4mm in diameter) now bent; socket very fragmentary.

321 Dublin, Co. Dublin   E71:16208  
*Excavations at High St, 1967-72. Late 11th/12th century.*
Blade convex-sided with convex base; stem (4mm in diameter) relatively short, possibly incomplete.

322 Dublin, Co. Dublin   E81:948  
*Excavations at Winetavern St, 1969-72. 13th century.*
Blade straight-sided with straight base; stem (3mm in diameter) now bent and incomplete at base.

L: (319) E: 21 W: 5 T: 2 D: (7) Wt: (35).

Excavations at Christchurch Place, 1972-76. Late 12th/13th century.
Not seen, but illustrated in Finds Register. Blade straight-sided with straight base; stem bent near end, clearly incomplete at base.
L: (87).

Excavations at Christchurch Place, 1972-76. 2nd half 11th century.
Blade straight-sided with straight base; stem (4mm in diameter) now bent; only stump of socket survives.
L: (260) E: 12 W: 14 T: 2 D: (5) Wt: 22

Excavations at Christchurch Place, 1972-76. 3rd quarter 11th century.
Blade concave-sided with straight base; stem (5mm in diameter) now slightly bent; socket encrusted but displays forging seam on one side.

Excavations at Christchurch Place, 1972-76. Mid-11th century.
Blade straight-sided with straight base; socket blocked with corrosion and/or traces of wooden shaft; forging seam, slightly open, visible on one side.
L: 129 E: 20 W: 15 T: 1 D: 8 Wt: 8

Excavations at Fishamble St, 1975-76. 11th/12th century.
Blade straight-sided with straight base; stem (5mm in diameter) of rounded/square section; socket displays forging seam and single nail hole opposite, 9mm from base; ragged and incomplete at base.
329 Dublin, Co. Dublin E172:2053
Excavations at Fishamble St, 1977-80. Mid-11th century.
Blade ragged but apparently straight-sided with convex base; stem 4mm in diameter; socket retains traces of wooden shaft, incomplete at base.

330 Dublin, Co. Dublin E172:12420 Fig. 20
Excavations at Fishamble St, 1977-80. 2nd half 10th century.
Blade straight-sided with concave base, giving slight basal barbs; stem swells slightly to stop at junction with tang; tang retains traces of wooden shaft.

331 Dublin, Co. Dublin E191:661
Found about 12 feet below surface in street cuttings at Werburgh Street, 1856. Very corroded. Blade very ragged, with apparent sloping run; stem (5mm in thickness) of squared section, relatively short, possibly incomplete.
L: (74) E: 17 (15) R: 3 W: 14 T: 4

332 Dublin, Co. Dublin E191:662 Fig. 20
Found "at some depth" during digging at the Four Courts, 1861.
Very corroded. Blade very ragged but apparently leaf-shaped; stem (5mm in thickness) or rectangular section, relatively short but apparently complete.
L: 110 E: 16 R: 15 W: 18 T: 4

333 Dublin, Co. Dublin Wk.31
19th century street cuttings in the neighbourhood of Christchurch/Fishamble St. Corroded. Blade straight-sided with straight base; stem (4mm in diameter) relatively long, with fragments of socket at base.
L: (184) E: 18 W: 15 T: 4 D: (8) Wt: 14

334 Dublin, Co. Dublin Wk.32
19th century street cuttings in the neighbourhood of Christchurch/Fishamble St. Blade straight-sided with straight base; stem (3mm in thickness) relatively long, of rectangular section, tapering to flat tang at base; now slightly twisted.
L: 199 E: 19 W: 15 (13) T: 2 Wt: 11

335 Unprovenanced X2811 Fig. 22
Blade straight-sided with straight base; stem (5mm in thickness) relatively long, of squared section, narrowing abruptly to about half its thickness 10mm from base, presumably to form a tang.
Possible Type 5 projectile heads

336 Clonmacnoise, Co. Offaly  E558:624
Possible arrowhead fragment. Blade convex-sided with straight base; only short fragment of stem (5mm in diameter), of squared section, survives.
L: (34)  E: 15  R: 1  W: 12  T: 4

337 Dublin, Co. Dublin  92E30:183  Fig. 20
Excavations at Christchurch Place, 1992.
Probable arrowhead. Blade slightly concave-sided with slightly sloping run; stem (4mm in thickness) relatively short, of rectangular section, tapering evenly to a pointed tang.
L: 78  E: 20  R: 1  W: 17  T: 3

338 Lurgankeel, Co. Louth  E55:256
Excavations at Lurgankeel motte, 1964.  Late 12th/early 13th century.
Possible arrowhead fragment. Small, thick blade, straight-sided with straight base, blunted at point; stem (3mm in diameter) relatively short, of square section, tapering to apparent pointed tang but possibly incomplete.
L: (43)  E: 14 (11)  W: 12  T: 4

Type 6

Unless otherwise stated, all projectile heads can be taken to have narrow bodkin blades of lozenge section, on straight stems of thick lozenge section which swell towards the junction with the tang, and straight, tapering tangs of square section.

339 Dublin, Co. Dublin  E71:650
Excavations at High St, 1967-72.  2nd half 12th century.
Corroded. Blade convex-sided, bent 25mm from point; stem almost parallel-sided; only stump of tang survives.
340 Dublin, Co. Dublin E71:3217
Excavations at High St, 1967-72. 11th century.
Blade convex-sided, almost shouldered; stem of rounded section, swelling evenly from blade to stop; tang bent, probably broken.

341 Dublin, Co. Dublin E71:4873
Excavations at High St, 1967-72. 12th century.
Blade convex-sided; tang missing.
L: 100 (84)  E: 43  R: 15  W: 7  T: 5  S: 21  Wt: 6

343 Dublin, Co. Dublin E71:10118
Excavations at High St, 1967-72. Late 11th/12th century.
Blade straight-sided with short shoulders above stem; relatively short stem of rounded/square section, swelling evenly to stop; tang bent.

344 Dublin, Co. Dublin E71:16228
Excavations at High St, 1967-72. Late 11th/early 12th century.
Blade convex-sided; stem concave-sided; tang possibly broken.

345 Dublin, Co. Dublin E71:16283
Excavations at High St, 1967-72. Late 11th/early 12th century.
Blade convex-sided, bent 10mm from point; relatively short stem, concave-sided, of rounded/square section; tang of rounded/square section.
L: 99  E: 53  R: 6  W: 7  T: 5  S: 16  Wt: 10

346 Dublin, Co. Dublin E71:16395

394 Dublin, Co. Dublin 1887:106
Found in 19th century street cuttings in vicinity of Christ Church cathedral.
Blade convex-sided; stem parallel-sided, but waisted at junction with blade; of roughly rounded section.
395 Dublin, Co. Dublin Wk.24

Found in 19th century street cuttings in vicinity of Christchurch/Fishamble St. Corroded. Blade almost parallel-sided, tapering abruptly 15mm from point; shouldered junction with parallel-sided stem, of round section; short tang of round section.
L: 105 E: 60 R: 5 W: 8 T: 6 Wt: 11

396 Limerick, Co. Limerick E534:1528

Excavations at King John's Castle, 1990. c.1175-1200. Blade convex-sided, slightly bent at tip; concave-sided stem of round section.
L: 94 E: 56 R: 5 W: 7 T: 5

397 Limerick, Co. Limerick E534:2319

L: 108 E: 71 R: 6 W: 8 T: 5

398 Limerick, Co. Limerick E534:4053

Excavations at King John's Castle, 1990. c.1175. Blade convex-sided, bent at point, of lozenge section; stem almost parallel-sided, swelling slightly at junction with tang; short tang, incomplete but probably not much longer originally.
L: 99 (96) E: 57 R: 10 W: 6 T: 5

399 Waterford, Co. Waterford E343:5394:123

Excavations at St Peter's church, 1986-87. Mid-12th century. Blade convex-sided; stem relatively long, slightly swollen at junction with tang, of rounded section; only stump of tang survives.
L: (106) E: 60 R: 6 W: 8 T: 6
Halpin, 'Archery material', p. 544; Fig. 15:26.33

400 Waterford, Co. Waterford E406:1718:5

Excavations at Peter St/High St/Cook Lane, 1987-88. Early/mid-12th century. Blade convex-sided, but ragged and missing point; short stem of roughly rounded section, slightly swollen at junction with tang; only stump of tang survives.
L: 105 (86) E: 54 (50) R: 6 W: 8 T: 6
Halpin, 'Archery material', p. 545.
401 Waterford, Co. Waterford E527:782:21
Short blade, convex-sided; relatively long, almost parallel-sided stem of rounded
section; only stump of tang survives.
L: 100 (89) E: 37 R: 11 W: 7 T: 4
Halpin, 'Archery material', p. 545; Fig. 15:26.35.

Halpin, 'Archery material', p. 544; Fig. 15:26.31.

404 Waterford, Co. Waterford E527:1446:14
Blade convex-sided; stem and tang almost undifferentiated, tapering evenly
throughout.
L: 96 E: 59 R: 6 W: 6 T: 5
Halpin, 'Archery material', p. 544; Fig. 15:26.29.

405 Waterford, Co. Waterford E527:1491:1
Excavations at Arundel Square, 1990. Late 11th century.
Blade convex-sided; short, concave-sided stem; rather crudely made, tang
especially is off-centre.
L: 96 E: 61 R: 2 W: 7 T: 7
Halpin, 'Archery material', p. 544; Fig. 15:26.30.

406 Waterford, Co. Waterford E527:1510:85
Corroded. Blade convex-sided, missing point; relatively long, concave-sided
stem; short tang, possibly incomplete.

408  Waterford, Co. Waterford  E550:10:3
Excavations at Bakehouse Lane, 1990.  Mid-12th century.
Blade convex-sided; relatively short, concave-sided stem; short tang, now bent.
L: 93 (91)  E: 49  R: 13  W: 7  T: 5
Halpin, 'Archery material', p. 544; Fig. 15:26.34.

Probable Type 6 projectile heads

409  Dublin, Co. Dublin  E71:1893
Excavations at High St, 1967-72.  13th century.
Probable arrowhead; only convex-sided blade survives; straight break at base of blade.
L: (62)  E: 31  R: 31  W: 5  T: 3  Wt: (2)

410  Dublin, Co. Dublin  E71:4621
Corroded, now conserved.  Blade convex-sided; stem very corroded.
L: 79  E: 42  R: 5  W: 5  T: 3  S: 25  Wt: 4

411  Dublin, Co. Dublin  E71:6881
Excavations at High St, 1967-72.  12th century.
Probable arrowhead.  Blade straight-sided, of square section, point missing; stem concave-sided, corroded but probably of rounded section; only possible stump of tang survives.
L: (72)  E: 44 (42)  W: 4  T: 3  S: 25  Wt: 5

412  Dublin, Co. Dublin  E122:1469  Fig. 22
Excavations at Christchurch Place, 1972-76.  2nd half 12th century.
Not seen, but Finds Register illustrates convex-sided blade above stem or tang (not clear which).
L: (82)  E: 43  R: 18  W: 6  T: 4  S: 21
413 Dublin, Co. Dublin  E122:16313
Excavations at Christchurch Place, 1972-76.  2nd quarter 11th century.
Probable arrowhead, corroded and encrusted. Blade convex-sided, of rectangular
section; stem very corroded, of indeterminate section; tang missing.
L: 113  E: 40  R: 35  W: 8  T: 5  S: 32

414 Dublin, Co. Dublin  E190:928
Probable arrowhead. Blade convex-sided, of square section; probable stem and
tang below blade, obscured by corrosion.

Type 6 variants

415 Dublin, Co. Dublin  E71:1140
Excavations at High St, 1967-72. 12th century.
Very corroded. Blade convex-sided, missing point; no stem; tang almost parallel-
sided, of lozenge section.

416 Dublin, Co. Dublin  E71:3418  Fig. 22
Excavations at High St, 1967-72. Late 12th century.
Blade ragged; no stem; tang of lozenge section.
L: 81  E: 58  R: 4  W: 7  T: 5  Wt: 6

417 Dublin, Co. Dublin  E71:5064
Excavations at High St, 1967-72. 11th century.
Blade straight-sided, of square section; no stem; tang of rather broad rectangular
section, now bent.
L: 66  E: 38  R: 7  W: 5  T: 5  Wt: 5

418 Dublin, Co. Dublin  E122:1839 *
Excavations at Christchurch Place, 1972-76. 11th/12th century.
Blade convex-sided; no stem; relatively long tang.
L: 93  E: 53  R: 10  W: 7  T: 6  Wt: 7
419  Dublin, Co. Dublin  E122:17220
Excavations at Christchurch Place, 1972-76. 2nd quarter 11th century.
Blade straight-sided, thickening to square section at junction with tang; no stem;
tang of rather broad rectangular section.
L: 114  E: 79  W: 6  T: 6  Wt: 10

420  Dublin, Co. Dublin  E172:9887
Excavations at Fishamble St, 1977-80.
Blade straight-sided, of square section; twisted at base into tang; no stem.
L: 108  E: 70  R: 3  W: 5  T: 5  Wt: 8

421  Dublin, Co. Dublin  E190:4418
Blade straight-sided, of square section; no stem; tang possibly broken.
L: (76)  E: 55  R: 3  W: 5  T: 4  Wt: 4

422  Dublin, Co. Dublin  E476:655
Excavations at 5-12 High St, 1989. Late 12th century.
Shouldered blade, straight-sided, with short, sloping run; no stem.
L: 85  E: 53  R: 8  W: 8  T: 7

Doubtful Type 6 projectile head

423  Dunamase or Park, Co. Laois  93E150:2832  Fig. 22
Excavations at Dunamase castle, 1993-97. Late 13th/first half 14th century.
Blade convex-sided, widest near point with long, tapering run, ending in abrupt,
straight junction with tang; no stem.
L: 75  E: 25  R: 30  W: 8  T: 6  Wt: 8

Subtype 6A

424  Dublin, Co. Dublin  E71:16602
Excavations at High St, 1967-72. Mid 11th century.
Short blade, slightly convex-sided, of square section; abrupt shoulders at junction
with stem; relatively long stem of rounded/square section; abrupt, straight stop;
tang of rounded section.
L: 72  E: 20  R: 2  W: 4  T: 4  S: 26  Wt: 6
Excavations at Fishamble St, 1977-80. 2nd half 10th century.
Short blade of square section, straight-sided with straight, flat base; relatively long stem of rounded section; abrupt, straight stop.
L: 75  E: 19  W: 4  T: 4  S: 38  Wt: 3

Subtype 6B

Unless otherwise stated, all projectile heads can be taken to have narrow bodkin blades of square section, with straight, flat bases and straight, tapering tangs of square section.

Excavations at High St, 1967-72. 13th century.
Thick blade, straight-sided; tang bent.
L: 102  E: 64  W: 8  T: 8  Wt: 20

Excavations at Christchurch Place, 1972-76. Uncontexted.
Blade largely missing, but straight-sided; tang slightly bent.

Excavations at Christchurch Place, 1972-76. Mid-11th century.
Thick blade.
L: 75  E: 57  W: 7  T: 6  Wt: 5

Excavations at Fishamble St, 1974-76. 11th century.
Blade straight-sided, of rectangular section; only stump of tang survives.
L: (83)  E: 69  W: 8  T: 7  Wt: 21

Excavations at Fishamble St, 1980-81. Mid-10th century.
Blade convex-sided.
L: 77  E: 42  R: 15  W: 5  T: 4  Wt: 8
Possible Type 6B projectile head

431 Dublin, Co. Dublin  E122:15643
Excavations at Christchurch Place, 1972-76.  2nd quarter 11th century.
Possible projectile head, corroded. Blade straight-sided, of rectangular section; tang of rounded section.
L: 64  E: 38  R: 1  W: 8  T: 3  Wt: 5

Type 7
Unless otherwise stated, all projectile heads can be taken to have narrow bodkin blades of square section and tapering sockets of round section.

746 Limerick, Co. Limerick E534:1529
Excavations at King John's Castle, 1990. c.1175-1200.
Blade straight-sided, waisted at junction with socket; socket displays ovoid nail hole opposite forging seam.
L: 128  E: 85  R: 6  W: 8  T: 8  D: 12

747 Limerick, Co. Limerick E534:4051
Excavations at King John's Castle, 1990. Uncontexted.
Very corroded. Short blade; socket almost undifferentiated from blade, displays probable rivet hole near base.

748 "Lough Revel", Co. Antrim UM 1077/11
Apparently found on a crannóg.
Very corroded. Long blade, straight-sided, of rectangular section with concave faces; socket almost undifferentiated from blade, of rectangular section but may have been rounded nearer base, which is missing.
L: (156)  E: 120  W: 10  T: 9

749 Loughpark, Co. Galway E54:56,
Excavations at Loughpark crannóg, 1913. ? 13th century.
Long blade, probably straight-sided, now bent and ragged; socket fragmentary, undifferentiated from socket, ragged at base and along forging seam, and displays a possible nail hole near base.
L: (172)  E: 125  W: 7  T: 7  D: 12

819 Dublin, Co. Dublin  E190:4100  
Blade now expanded and of rounded section at present point, probably due to corrosion; point missing; socket ragged and broken at base.  
L: (82)  E: 54  W: 5  T: 5  D: 9  Wt: 7

820 Dublin, Co. Dublin  E190:4319  
*Excavations at Fishamble St, 1980-81.  Early 11th century.*  
Probable bodkin blade of rectangular section, convex-sided, possibly an unfinished leaf-shaped blade; socket broken at base.  
Probable arrowhead blade. Straight, narrow blade of square cross-section, slightly convex-sided; socket missing.

Possible Type 7 projectile heads

Doubtful projectile head. Short, sharply tapering blade of rectangular section, shouldered at junction with socket; socket splay widely, very ragged, especially along forging seam; base ragged and incomplete; pair of nail holes near base.
L: 55 E: 17 R: 4 W: 8 T: 5 D: 15

Excavations at High St, 1967-72. Late 11th/early 12th century.
Blade of rectangular section with wide, blunt point; socket blocked with corrosion and/or traces of wooden shaft; base ragged.
L: (75) E: 38 R: 2 W: 7 T: 7 D: 9 Wt: 11

Excavations at Winetavern St, 1969-72. 11th century.
Broad blade of rectangular section, convex-sided; socket has large opening above forging seam for 15mm above base.

Excavations at Winetavern St, 1969-72. 11th century.
Very small blade, convex-sided; socket flattened and split, base missing.
L: (34) E: 8 R: 6 W: 3 T: 3 D: 6 Wt: 2

Excavations at Winetavern St, 1969-72. 12th/13th century.
Blade of square section with chamfered corners; socket blocked with corrosion and/or traces of wooden shaft.

828 Dublin, Co. Dublin E122:16294
Excavations at Christchurch Place, 1972-76. 2nd quarter 11th century.
Possible projectile head, straight-sided and undifferentiated, but very corroded; could alternatively be a nail with expanded head.
L: 66

829 Dublin, Co. Dublin E172:5613
Excavations at Fishamble St, 1977-80. Mid-11th century.
Possible projectile blade of square section with chamfered corners, convex-sided.
L: (54)  E: 54  W: 7  T: 7  Wt: 18

830 Loughpark, Co. Galway E54:65
Excavations at Loughpark crannóg, 1913. 13th century.
Corroded. Blade probably straight-sided; socket almost undifferentiated from blade, displays ragged forging seam on one side, ragged and broken at base.
L: (85)  E: 36  W: 6  T: 6 (4)  D: 16 (14)

Type 8
Unless otherwise stated, all projectile heads can be taken to have short bodkin blades of square section and tapering sockets of round section.

831 Armagh, Co. Armagh EHS Fig. 29
Crossbow bolt on portion of wooden shaft. Blade shouldered, now blunted at point; relatively long, broad socket, displaying two nail heads, one above the other, on one side.

841 Dublin, Co. Dublin E122:821
Excavations at Christchurch Place, 1972-76.
Tip of broad blade, slightly convex sides, of flattened lozenge section.
L: (17)  E: (17)  W: (10)  T: (3)

842 Dublin, Co. Dublin E122:1751
Excavations at Christchurch Place, 1972-76.
Doubtful projectile head of Type 2 form, very corroded but now conserved.
Narrow, leaf-shaped "blade", convex-sided, of very thin flattened lozenge section; traces of apparent socket at base.
L: (46)  E: 30 (28)  R: 4  W: (11)  T: (2)

843 Dublin, Co. Dublin E122:5886
Excavations at Christchurch Place, 1972-76. Probably late 11th century.
Blade of projectile head of Types 1 or 2. Shouldered blade, convex-sided with convex-sided run, slightly bent; stem and socket/tang missing.
L: (42)  E: 29  R: 13  W: 14  T: 2
Excavations at Christchurch Place, 1972-76. Late 11th century.

Socket, presumably of an arrowhead; almost parallel-sided but swells markedly at one end, probably largely due to corrosion; remains of wooden shaft within socket.
L: (39)  D: 9

Excavations at Fishamble St, 1974-76.

Tip of projectile head of Types 1, 2 or 4. Blade convex-sided, of flattened lozenge section.
L: (31)  E: (31)  W: (14)  T: (4)

Excavations at Fishamble St, 1975-76.

Tip of projectile head of Type 1 or 2, or possibly of a spearhead. Long, narrow blade with convex sides, of flattened lozenge section.
L: (54)  E: (54)  W: (15)  T: (3)

Excavations at Fishamble St, 1977-80.

Blade fragment, triangular with convex sides, point missing, of flat lozenge section; straight break at base.
L: (57)  E: 63 (54)  R: 3  W: 24  T: 5  Wt: (15)

Excavations at Fishamble St, 1977-80.

Possible unfinished projectile head of Type 1 or 2 form. Narrow, leaf-shaped blade, convex-sided, of flattened lozenge section; below this is a straight-sided stump of rectangular section, possibly an unfinished socket or tang.
L: 54  E: 33  R: 5  W: 9  T: 4  Wt:
850 Dunamase or Park, Co. Laois 93E150:353
Probable socket of arrowhead, with short, shapeless stump of blade, obscured by corrosion but possibly of Type 7.
L: (51) E: (21) W: (12) T: (7) D: 11 (13)

851 Fanore (Beg or More), Co. Clare 1937:2618 Fig. 29
Found "in a pile of stones".
Very corroded. Leaf-shaped blade of thick, pointed oval section; relatively long socket of indeterminate section, very incomplete.
L: (98) E: 33 R: 21 W: (18) T: (10) D: (15)

852 "Lough Fea", Co. Monaghan 1959:208 Fig. 29
Apparently found at Lough Fea, 1854.
Corroded. Leaf-shaped blade of lozenge section; socket displays a nail hole near base; another may have been diametrically opposite, but base of socket is broken.
L: (76) E: 31 R: 8 W: 15 T: 8 D: 14

853 Waterford, Co. Waterford E527:1631:6
Excavations at Arundel Square, 1990. Late 11th century.
Short blade, parallel-sided but waisted at junction with socket, with flat, blunt end; apparently of square section with possible chamfered corners; socket displays one nail in situ near base.
L: 50 E: 13 R: 10 W: 6 T: 6 D: 7
Halpin, 'Archery material', p. 544; Fig. 15:26.28.

854 Unprovenanced Wk.79 Fig. 29
Broad, crescentic-shaped blade set transversely across socket; of triangular section, though almost flat at extremities; socket displays forging seam, soldered with copper alloy; traces of copper alloy plating also present on socket and blade.
L: 68 E: 2 R: 27 W: 63 T: 7 D: 15 Wt: 26
