IWER: Thank you for taking part in this second wave of the IDS-TILDA study. As you know, this study is interested in learning about the health and well-being of people aged 40 and over. This interview is completely voluntary and private. If we should come to any question you don't want to answer, just let me know and I will go on to the next question. The answers that you give will be kept private and will be used only for research purposes.

IWER: Verbal consent should be negotiated throughout the interview process

Living Circumstance

CS1	INTRO: Now I would like to ask some questions about where you live.	
	We have asked this question of you before but we are interested in finding out if many people have moved house since their last interview.	
	Where do you live most of the time?

Physical Activity

BH 15

INTRO: We are interested in finding out about the kinds of physical activities that people do as part of their everyday lives. **The next set of questions will ask you about the time you spent being physically active in the last 7 days.** Please answer each question even if you do not consider yourself to be an active person. Please think about the activities you do at work, as part of your house and garden work, to get from place to place and in your spare time for recreation, exercise or sport.

Vigorous physical activities can be considered anything that lasts at least 10 to 20 minutes, which causes heavy sweating and makes you breathe harder than normal.

For example: running or jogging, exercise bike, vigorous swimming, cycling, aerobics or gym workout, tennis, heavy housework or gardening like digging with a spade or shovel.

IWER: During the last 7 days on how many days did you do vigorous physical exercise.
