***Mobile Telecommunications Summit***

***Granada, Spain  
November 27-29 1996***

***Volume 1***

# Table of Contents

|                                                                            |          |
|----------------------------------------------------------------------------|----------|
| <b>European Third Generation Mobile Systems.....</b>                       | <b>1</b> |
| <i>J. S. Dasilva, B. Arroyo, B. Barini, D. Ikonou, European Commission</i> |          |

## **Preliminary Programme (Invited Papers)**

*Chairmen: B. Fernandes, Chairman ACTS Mobile & Personal Wireless Domain.  
J. S. Dasilva, Head of Unit, Mobile Communications European Commission.*

|                                                                           |           |
|---------------------------------------------------------------------------|-----------|
| <b>1. Mobile Access Technologies - What's Next? .....</b>                 | <b>21</b> |
| <i>R. Steele, Multiple Access Communications, UK.</i>                     |           |
| <b>2. IMT-2000 (FPLMTS) Standardization .....</b>                         | <b>25</b> |
| <i>M. H. Callendar, C. Eng. MIEE, Canada.</i>                             |           |
| <b>3. A perspective of Third Generation Mobile Systems in Japan .....</b> | <b>26</b> |
| <i>A. Sasaki.</i>                                                         |           |
| <b>4. Shaping the wireless vision of Europe. The UMTS Forum .....</b>     | <b>27</b> |
| <i>E. Candy.</i>                                                          |           |

## **Session A1 - Radio interface for high speed trains**

*Chairman: P. Moody, Smith Engineering Ltd., UK.*

|                                                                                                                                       |           |
|---------------------------------------------------------------------------------------------------------------------------------------|-----------|
| <b>1. MOSTRAIN System Architecture .....</b>                                                                                          | <b>28</b> |
| <i>J. Irvine, University of Strathclyde, UK.</i>                                                                                      |           |
| <i>J.P. Couvy, Thomson-CSF Communications, France.</i>                                                                                |           |
| <i>J. Laurila, Helsinki University of Technology, Finland.</i>                                                                        |           |
| <i>G. Mossakowski, De Te Mobil, Germany.</i>                                                                                          |           |
| <i>P. Robin, Trialog, France.</i>                                                                                                     |           |
| <i>F. Delli Priscoli, University of Rome, Italy.</i>                                                                                  |           |
| <b>2. Applying scheduling algorithms to RF resources .....</b>                                                                        | <b>35</b> |
| <i>J. Billion, A. Kung, P. Robin, Trialog, France.</i>                                                                                |           |
| <b>3. Adaptive Nonlinear Equalization of Digital Radio Channels at 360 kbit/s and 2 GHz in the High-Speed-Train Environment .....</b> | <b>41</b> |
| <i>E. Bacarelli, R. Cusani, G. Di Blasio, S. Galli, M. Gneo, University of Rome 'La Sapienza', Italy.</i>                             |           |
| <b>4. Performance Potential of an Adaptive Radio Interface for MOSTRAIN .....</b>                                                     | <b>48</b> |
| <i>A. Arregui, J. Irvine, J. Dunlop, University of Strathclyde, UK.</i>                                                               |           |

## **Session A2 - Architecture and signalling**

*Chairman: I. Berberana, Telefónica I+D, Spain.*

|                                                                                                       |           |
|-------------------------------------------------------------------------------------------------------|-----------|
| <b>1. FRAMES BSS Network Architecture.....</b>                                                        | <b>54</b> |
| <i>R. Haferbeck, D. Ernst, Siemens AG, Germany.</i>                                                   |           |
| <i>S. Huusko, Nokia Telecommunications, Finland.</i>                                                  |           |
| <i>L. Laitinen, Nokia Research Center, Finland.</i>                                                   |           |
| <b>2. High Layer Air Interface Protocols for FRAMES .....</b>                                         | <b>61</b> |
| <i>J. Vialén, Nokia Research Center, Finland.</i>                                                     |           |
| <i>P. Beming, Ericsson Radio Systems Ab, Sweden.</i>                                                  |           |
| <i>G. Vermuyten, Siemens Atea, Belgium.</i>                                                           |           |
| <i>D. Verrier, France Telecom CNET, France.</i>                                                       |           |
| <i>J. Hernández, L. von Allmen, CSEM, Switzerland.</i>                                                |           |
| <b>3. Design and Demonstration of Call/Connection Control Signalling in UMTS Access Network .....</b> | <b>67</b> |
| <i>N. H. Loukas, University of Athens Panepistimiopolis, Greece.</i>                                  |           |
| <i>M. de Lignie, T. Norp, KPN Research, The Netherlands.</i>                                          |           |
| <i>K. Georgokitsos, Alcatel Telecom, Germany.</i>                                                     |           |
| <i>J. De Vriendt, Alcatel Telecom, Belgium.</i>                                                       |           |

|                                                                                     |           |
|-------------------------------------------------------------------------------------|-----------|
| <b>4. UMTS Signalling Network Layer and its Verification Using SDL.....</b>         | <b>74</b> |
| <i>J. Nelson, M. Barry, G. Fleming, D. Madden, University of Limerick, Ireland.</i> |           |

## Session A3 - ACTS Trial systems

*Chairman: H. Herbrig, Alcatel SEL, Germany.*

|                                                                                                                                |            |
|--------------------------------------------------------------------------------------------------------------------------------|------------|
| <b>1. Fibre Supported mm-wave Radio - a Route to the Broadband Local Loop? .....</b>                                           | <b>85</b>  |
| <i>P. Lane, J. O'Reilly, University College London, UK.</i>                                                                    |            |
| <i>M. Mittrich, Alcatel-SEL, Germany.</i>                                                                                      |            |
| <i>E. Pennard, CNET, France.</i>                                                                                               |            |
| <b>2. OnTheMove Field Trials (Testbeds And Results) .....</b>                                                                  | <b>91</b>  |
| <i>T. Kassing, K. David, B. Jülich, T. Wierlemann, DeTeMovil, Germany.</i>                                                     |            |
| <i>F. Deecke, Burda New Media GmbH, Germany.</i>                                                                               |            |
| <i>Y. Ismailov, Royan Institute for Technology, Sweden.</i>                                                                    |            |
| <i>M. Krautgärtner, Siemens AG, Germany.</i>                                                                                   |            |
| <i>J. Martinsson, Bonnier Information Services AB, Sweden.</i>                                                                 |            |
| <i>M. Meyer, Ericsson Eurolab Deutschland GmbH, Germany.</i>                                                                   |            |
| <i>F. Reichert, Ericsson Radio AB, Sweden.</i>                                                                                 |            |
| <b>3. A multimedia PDA for a UMTS environment.....</b>                                                                         | <b>97</b>  |
| <i>J. D. Morris, J. Goodenough, N. L. Seed, A. Benson, M.K. Yanni, P. A. Ivey, S.P. Larcombe, University of Sheffield, UK.</i> |            |
| <b>4. FRAMES Demonstrator Implementation Roadmap .....</b>                                                                     | <b>104</b> |
| <i>T. Mäkeläinen, R. Suoranta, J. Takala, Nokia Research Center, Finland.</i>                                                  |            |
| <i>W. Baumberger, K. Sabatakakis, Centre Suisse d'Electronique et de Microtechnique, Switzerland.</i>                          |            |
| <i>P. Blanc, Centre National d'Etudes des Telecommunications, France.</i>                                                      |            |
| <i>F. Cercas, Instituto Superior Técnico, Portugal.</i>                                                                        |            |
| <i>T. Coenen, Delft University of Technology, The Netherlands.</i>                                                             |            |
| <i>P. Croft, Roke Manor Research Limited, UK</i>                                                                               |            |
| <i>P. Jung, University of Kaiserslautern, Germany.</i>                                                                         |            |

## Session B1 - Access schemes

*Chairman: B. Arroyo, EC, Belgium.*

|                                                                                                 |            |
|-------------------------------------------------------------------------------------------------|------------|
| <b>1. Spectrum Efficiency Evaluation of an Advanced TDMA System for UMTS .....</b>              | <b>109</b> |
| <i>P. Blanc, K. Boullé, CNET/PAB, France.</i>                                                   |            |
| <b>2. Access Technique Selection for the MOSTRAIN System.....</b>                               | <b>117</b> |
| <i>J. Laurila, S. Korpela, J. Mattila, Y. Zhao, Helsinki University of Technology, Finland.</i> |            |
| <i>F. Delli Priscoli, G. Picciano, University of Rome, 'La Sapienza', Italy.</i>                |            |
| <i>L. Ramel, Thomson - CSF Communications, France.</i>                                          |            |
| <i>J. Irvine, University of Strathclyde, UK.</i>                                                |            |
| <b>3. Comparative Study of Hybrid Multiple Access Schemes for UMTS.....</b>                     | <b>124</b> |
| <i>T. Ojanpera, Nokia Research Center, Finland.</i>                                             |            |
| <i>P. O. Anderson, Ericsson Radio Systems AB, Sweden.</i>                                       |            |
| <i>J. Castro, CSEM, Switzerland.</i>                                                            |            |
| <i>L. Girard, France Telecom CNET, France.</i>                                                  |            |
| <i>A. Klein, Siemens AG, Germany.</i>                                                           |            |
| <i>R. Prasad, Delft University of Technology, The Netherlands.</i>                              |            |
| <b>4. Overview of the Link Level Studies for FRAMES Multiple Access Schemes.....</b>            | <b>131</b> |
| <i>K. Boullé, France Telecom CNET, France</i>                                                   |            |
| <i>R. Pirhonen, A. Toskala, T. Ojanpera, Nokia Research Center, Finland.</i>                    |            |
| <i>R. Prasad, Delft University of Technology, The Netherlands.</i>                              |            |
| <i>J. P. Castro, L. Chalard, CSEM, Switzerland.</i>                                             |            |

## Session B2 - The role of IN

*Chairman: C. Cooke, Vodafone, UK.*

1. **Mobility, IN and the future** ..... 138  
*E. Mahon, A. M. Corless, Broadcom Eireann Research Ltd., Ireland.*
2. **INAP Evolution for the Support of Terminal Mobility** ..... 144  
*W. van den Broek, B. Samsom, KPN Research, The Netherlands.*  
*K. Georgokitsos, A. Weber, Alcatel Telecom, Germany.*
3. **Support of Integrated Mobility Through an Evolved IN platform** ..... 151  
*J. Nelson, C. Morris, Teltec, Ireland.*  
*L. Vezzoli, R. Gobbi, Italtel, Italy.*

## Session B3 - ACTS Trial systems II

*Chairman: T. Norp, KPN Research, The Netherlands.*

1. **MOMUSYS - Mobile Multimedia Systems** ..... 158  
*D. Lappe, Robert Bosch, Germany.*
2. **SECOMS Demonstrators for Broadband Mobile Satellite Links at Ka and EHF Bands** ..... 165  
*G. Losquadro, Alenia Spazio, Italy.*
3. **RAINBOW: a Radio-Independent Network Platform for UMTS** ..... 173  
*E. Berruto, G. Colombo, CSELT, Italy.*  
*K. David, R. Hillebrand, DeTeMobil GmbH, Germany.*
4. **DECT/ATM Based UMTS Demonstration and Trial System** ..... 179  
*H. Herbrig, R. Rheinschmitt, Alcatel Telecom, Germany.*

## Session C1 - Access schemes II

*Chairman: C. Ciotti, IMST, Germany.*

1. **CDMA Synchronization in Near-Far Environments**..... 186  
*S. Calvo, J. Riba, G. Vazquez, Universitat Politècnica de Catalunya, Spain.*
2. **System Design for Next Generation Mobile Telecommunications** ..... 195  
*E.K. Hong, Y.W. Park, J.H. Choi, Korea Mobile Telecom, Korea.*
3. **Physical Layer Architecture and Performance in the WAND User Trial System**..... 196  
*J. P. Aldis, M. P. Althoff, Ascom Techn AG, Switzerland.*  
*R. Van Nee, Lucent Technologies, The Netherlands.*
4. **Admission Control Guaranteeing Quality of Service in Packet Access based Pico-Cellular Networks** ..... 204  
*U. Weiss, U. Dropmann, P. Godlewski, Ecole Nationale Supérieure des Télécommunications, France.*

## Session C2 - Mobility and security issues

*Chairman: G. Horn, Siemens AG, Germany.*

1. **The impact of Handover/Macrodiversity on the UMTS Mobility Server of the RAINBOW Demonstrator** ..... 211  
*J. De Vriendt, Alcatel Telecom, Belgium.*  
*M. Maraki, Intracom, Greece.*  
*B. Perrin, Centre Suisse d'Electronique, Switzerland.*  
*Y. Kriaras, Lucent Technologies, UK.*  
*E. Zervas, L. Merakos, University of Athens, Greece.*
2. **On the Performance of High to Low Level Handoff in a Hierarchical Personal Communication System** ..... 218  
*D. Zeghlache, F. Khan, D. Calin, Institut National del Télécommunications, France.*

|                                                                                           |            |
|-------------------------------------------------------------------------------------------|------------|
| <b>3. Migration/Evolution Towards UMTS - Security Issues .....</b>                        | <b>225</b> |
| <i>G. Vanneste, J. Degraeve, Siemens ATEA, Belgium.</i>                                   |            |
| <i>G. Lyberopoulos, Y. Vithynos, Panafon, Greece.</i>                                     |            |
| <i>C. Cooke, Vodafone, UK.</i>                                                            |            |
| <b>4. Novel Techniques for Fraud Detection in Mobile Telecommunication Networks .....</b> | <b>231</b> |
| <i>Y. Moreau, B. Preneel, ESAT K.U. Leuven, Belgium.</i>                                  |            |
| <i>P. Burge, J. Shawe-Taylor, Royal Holloway, University of London, UK.</i>               |            |
| <i>C. Stoermann, Siemens AG, Germany.</i>                                                 |            |
| <i>C. Cooke, Vodafone, UK.</i>                                                            |            |

## Session C3 - Standards

*Chairman: F. Hillebrand, ETSI, France.*

|                                                                                        |            |
|----------------------------------------------------------------------------------------|------------|
| <b>1. Standardization Aspects of the 21st Decade Mobile Systems and Services .....</b> | <b>237</b> |
| <i>T. Leskinen, Nokia Mobile Phones, Finland.</i>                                      |            |
| <b>2. FRAMES Contribution to the Standardization of the UMTS Air Interface.....</b>    | <b>244</b> |
| <i>F. de Ryck, CNET/PAB, France.</i>                                                   |            |
| <i>H. Persson, Ericsson Radio Systems AB, Sweden.</i>                                  |            |
| <i>T. Leskinen, Nokia Mobile Phones, Finland.</i>                                      |            |
| <i>T. Ojanpera, Nokia Research Center, Finland.</i>                                    |            |
| <i>W. Mohr, Siemens AG, Germany.</i>                                                   |            |
| <b>3. An Overview of Wireless ATM Standardization .....</b>                            | <b>250</b> |
| <i>J. Kruys, Lucent Technologies, The Netherlands.</i>                                 |            |
| <i>M. Niemi, Nokia Mobile Phones, Finland.</i>                                         |            |

## Session D1 - Specific radio issues

*Chairman: J. Jiménez, Telefónica I+D, Spain.*

|                                                                                              |            |
|----------------------------------------------------------------------------------------------|------------|
| <b>1. Interactive Television Return Path Using DECT Technology .....</b>                     | <b>256</b> |
| <i>M. E. Gerboles, Alcatel Telecom, Spain.</i>                                               |            |
| <b>2. Optimization of Mixed UMTS Satellite and Terrestrial Interconnecting Network .....</b> | <b>263</b> |
| <i>G. Albano, A. Perrone, Nuova Telespazio, Italy.</i>                                       |            |
| <i>C. Lepschy, G. Minerva, CSELT, Italy.</i>                                                 |            |
| <i>J. G. Markoulidakis, D. Tsirkas, NTUA, Greece.</i>                                        |            |
| <b>3. Maximizing Diversity in Coded Slow Frequency-Hopped Communications .....</b>           | <b>269</b> |
| <i>R. Knopp, P. A. Humblet, Institut Eurecom, France.</i>                                    |            |
| <b>4. C/I Performance in Packet Access Systems with Automatic Power Control .....</b>        | <b>275</b> |
| <i>P. Kasapidis, Matsushita Communications Industrial, UK.</i>                               |            |
| <i>Y. Kriaras, Lucent Technologies, UK.</i>                                                  |            |
| <b>5. Analysis of Reducing Interference Tools in Urban Environments .....</b>                | <b>282</b> |
| <i>C. Carbajo, R. Baudín, E. Alonso, Telefónica Móviles, Spain.</i>                          |            |

## Session D2 - Antennas technology

*Chairman: T. Bull, ERA Technology, UK.*

|                                                                                            |            |
|--------------------------------------------------------------------------------------------|------------|
| <b>1. Low Cost mm-Wave Antennas for Wireless Access to Broadband Services .....</b>        | <b>289</b> |
| <i>M. H. Capstick, D. S. Lockyer, M. A. Page-Jones, University of York, UK.</i>            |            |
| <b>2. Feasibility study of mm-wave metal antennas .....</b>                                | <b>295</b> |
| <i>B. Kolundzija, University of Belgrade, Yugoslavia.</i>                                  |            |
| <i>V. Brankovic, S. Zimmermann, E. Förster, Dresden University of Technology, Germany.</i> |            |
| <i>R. L. Louarn, Dassault Electronique, France.</i>                                        |            |
| <b>3. An Advanced Antenna System - Unplugged .....</b>                                     | <b>302</b> |
| <i>J. W. Clarkson, ERA Technology, UK.</i>                                                 |            |
| <b>4. Robust Beamforming for GPS and Mobile Communication Purposes.....</b>                | <b>308</b> |
| <i>A. Pérez-Neira, M. A. Lagunas, Universitat Politècnica de Catalunya, Spain.</i>         |            |

## Session D3 - User requirements

Chairman: A. Munro, University of Bristol, UK.

1. **Requirements for UMTS Applications**.....315  
*J. L. López, B. Martínez, E. Cano, Sistemas Expertos, Spain.*  
*X. Castilla, J. Padullés, Hospital General de Manresa, Spain.*
2. **Information Services for Mobile Users. Requirements and Issues**.....319  
*A. Bujosa Brun, A. M. Martínez San José, A. B. Rotjer, Sistemas Expertos, Spain.*
3. **Railway Aspects of UMTS Services**.....326  
*D.J.S. Williams, Y. Verollerman, J.L. Lopes, T. Wierlemann, Siemens, UK.*
4. **Usability requirements of mobile multimedia services in MOMENTS** .....333  
*K. Väänänen - Vainio - Mattila, Nokia Research Center, Finland.*

## Session E1 - Access schemes III

Chairman: M. Gundmundso, Ericsson R.S., Sweden.

1. **An All-Digital Symbol Tracking Algorithm in an OFDM System Using the Cyclic Prefix**.....340  
*J. Kuronen, P. Kaasila, A. Mämmelä, VTT Electronics, Finland.*
2. **Performance Analysis of a DCQPSK-OFDM Modem Using Analog BB Filters** .....346  
*M. G. Di Benedetto, P. Mandarini, University of Rome 'La Sapienza', Italy.*
3. **Parallel Advanced Time Division Multiple Access Modems for UMTS** .....354  
*T.Keller, L.Hanzo, University of Southampton, UK.*
4. **Analysis of the Microcellular Solution** .....355  
*R. Baudín, C. Carbajo, E. Alonso, Telefónica Móviles, Spain.*

## Session E2 - Technologies

Chairman: A. Watson, Motorola, UK.

1. **The AC006 MEDIAN Project - Overview and State of the Art**.....362  
*C. Ciotti, , IMST, Germany.*  
*J. Borowski, University of Dresden, Germany.*
2. **InP HBT Phototransistor for Radio over Fibre communication system** .....368  
*C. González, J. Dangla, P. Launay, J. L. Benchimol, CNET, France.*
3. **Alternative Polarizations for Specific Environments**.....372  
*R. Baudín, C. Carbajo, E. Alonso, Telefónica Móviles, Spain.*
4. **Enabling Technology for the Software Radio - 3G Mobile Applications** .....379  
*C. Taylor, ERA Technology, UK.*

## Session E3 - Service requirements

Chairman: E. Geulen, , Ericsson Eurolab, Germany.

1. **Global Mobile Multimedia and Special Needs** .....385  
*A. T. D. Munro, University of Bristol, UK.*
2. **UMTS Multimedia Service Trials**.....391  
*D. Bozward, Orange, UK.*
3. **Modelling and Performance Evaluation of UMTS Services Over the DECT Air Interface**.....398  
*A. Baiocchi, M. Listanti, University of Rome 'La Sapienza', Italy.*
4. **Analysis of Multimedia Services and Traffic Models for the COBUCO System**.....405  
*C. Delucchi, H. Bischl, T. Bregenzer, DLR. Germany.*

## Session F1 - Multimedia via satellites

Chairman: B. Barani, EC, Belgium.

1. **Multimedia Services using Portable and Mobile Satellite Terminals** .....412  
*G. Losquadro, Alenia Spazio, Italy.*
2. **Link Design and Dimensioning aspects in the FRAME of SECOMS Project**.....420  
*M. Luglio, University of Rome Tor Vergata, Italy.*  
*M. Marinelli, Alenia Spazio, Italy.*  
*A. Paraboni, Polytechnic of Milano, Italy.*
3. **SECOMS Satellite Characteristics for Mobile Multimedia Services** .....429  
*M. Marinelli, S. Di Girolamo, Alenia Spazio, Italy.*  
*R. Pérez-Leal, Alcatel Espacio, Spain.*  
*P. Taaghoh, University of Surrey, UK.*
4. **Protocols for a GEO Multi-Spot Satellite System with OBP Capabilities** .....437  
*F. Delli Priscoli, University of Rome 'La Sapienza', Italy.*

## Session F2 - Physical layer issues of WLAN

Chairman: D. Lappe, R. Bosch, Germany.

1. **Analysis of Non-Linearities in the MEDIAN System**.....445  
*P. Mandarini, M. G. Di Benedetto, University of Rome 'La Sapienza', Italy.*  
*R. Lelouarn, T. Dequen, Dassault Electronique, France.*  
*V. Brankovic, Dresden University of Technology, Germany.*
2. **Influence of Clipping, Quantization and Non-Linear HPA on OFDM for a 60 GHz WLAN System** .....450  
*E. Bogenfeld, R. Valentin, Deutsche Telekom AG, Germany.*
3. **Performance Analysis of a Fine Frequency Error Estimator for OFDM Transmission** .....457  
*A. Falaschi, P. Mandarini, University of Rome 'La Sapienza', Italy.*
4. **Coarse Frame Synchronization Structures in OFDM** .....464  
*M. Kiviranta, A. Mämmelä, VTT Electronics, Finland.*

## Session F3 - Service requirements II

Chairman: J. Salo, Nokia Mobile Phones, Finland.

1. **Innovation or Integration: the Development of Interactive Broadcast Services**.....471  
*P. Luff, C. Heath, University of Nottingham, UK.*  
*H. Knoblauch, University of Konstanz, Germany.*
2. **Using Wireless ATM for Mobile Access to "Living" Information** .....478  
*C. Köchling, T. Mark, R. Bosch, Germany.*
3. **MEDIAN Service Requirement Study** .....486  
*S. Maltha, R. Overduin, TNO, The Netherlands.*
4. **The Use of Trusted Third Parties and Secure Billing in UMTS**.....493  
*H. J. Hitz, G. Horn, V. Kessler, Siemens AG, Germany.*  
*L. Knudsen, C. Radu, ESAT-COSIC, Belgium.*  
*L. Chen, K. Howker, C. J. Mitchell, University of London, UK.*

## Session G1 - Adaptive antenna techniques

Chairman: F. Settimo, CSELT, Italy.

1. **Propagation, Beamsteering and Uplink Combining Algorithms for Cellular Systems**.....500  
*P. Zetterberg, P. Leth-Espensen, P. Mogensen, Center for PersonKommunikation, Aalborg University, Denmark.*

|                                                                                                                                        |            |
|----------------------------------------------------------------------------------------------------------------------------------------|------------|
| <b>2. Downlink Beamforming for Spatially Distributed Sources in Cellular Mobile Communications .....</b>                               | <b>510</b> |
| <i>J. Goldberg, J. R. Fonollosa, Universitat Politècnica de Catalunya, Spain.</i>                                                      |            |
| <b>3. TSUNAMI (II) Stand Alone Testbed .....</b>                                                                                       | <b>517</b> |
| <i>P. E. Mogensen, F. Frederiksen, H. Dam, K. Olesen, S. Leth Larsen, Center for PersonKommunikation, Aalborg University, Denmark.</i> |            |
| <b>4. Blind Array Processing Methods For CDMA Systems.....</b>                                                                         | <b>528</b> |
| <i>C. Antón-Haro, O. Muñoz, J. A. Fernández-Rubio, J. R. Fonollosa, Universitat Politècnica de Catalunya, Spain.</i>                   |            |

## Session G2 - Wireless access I

*Chairman: H. Mitts, VTT, Finland.*

|                                                                                                        |            |
|--------------------------------------------------------------------------------------------------------|------------|
| <b>1. The Magic WAND: a wireless ATM access system .....</b>                                           | <b>535</b> |
| <i>J. Mikkonen, Nokia Mobile Phones, Finland.</i>                                                      |            |
| <i>J. Kruys, Lucent Technologies, The Netherlands.</i>                                                 |            |
| <b>2. Description of the Handover Algorithm for the Wireless ATM Network Demonstrator (WAND) .....</b> | <b>543</b> |
| <i>H. Hansén, J. Immonen, VTT Information Technology, Finland.</i>                                     |            |
| <i>S. Hadjiefthymiades, A. Kaloxylas, University of Athens, Greece.</i>                                |            |
| <b>3. Network Handover for Wireless ATM Systems .....</b>                                              | <b>549</b> |
| <i>D. Plassmann, A. Kadelka, Technical University of Aachen, Germany.</i>                              |            |
| <b>4. Managing A Wireless ATM Network .....</b>                                                        | <b>556</b> |
| <i>I. E. Pavlidis, I. F. Marias, N. B. Pronios, Intracom SA, Greece.</i>                               |            |

## Session G3 - Demonstration and application scenarios

*Chairman: E. Alonso, Telefónica Móviles, Spain.*

|                                                                                                         |            |
|---------------------------------------------------------------------------------------------------------|------------|
| <b>1. MobilAT - Extending ATM Towards Mobile Wireless end Systems .....</b>                             | <b>563</b> |
| <i>D. Elias, T. Luckenback, M. Mateescu, GMD FOKUS, Germany.</i>                                        |            |
| <b>2. Client/Server Architectures for Mobile Users: The ACTS OnTheMove Project .....</b>                | <b>570</b> |
| <i>E. Geulen, Ericsson Eurolab, Germany.</i>                                                            |            |
| <i>H. G. Baumgarten, Siemens AG, Germany.</i>                                                           |            |
| <i>K. Davids, T. Wierlemann, Deutsche Telekom MobilNet, Germany.</i>                                    |            |
| <i>J. Harmer, BT Laboratories, UK.</i>                                                                  |            |
| <i>J. Hjelm, Bonnier Information Services, Sweden.</i>                                                  |            |
| <i>F. Reichert, Ericsson Radio Systems AB, Sweden.</i>                                                  |            |
| <b>3. Proposal for UMTS Joint Demonstrations.....</b>                                                   | <b>575</b> |
| <i>P. Blanc, CNET, France.</i>                                                                          |            |
| <i>C. Taylor, ERA, UK.</i>                                                                              |            |
| <i>P. Mège, MATRA, France.</i>                                                                          |            |
| <i>E. Berruto, CSELT, Italy.</i>                                                                        |            |
| <b>4. DECT Architecture Proposal for a construction SITE .....</b>                                      | <b>581</b> |
| <i>S. Ruiz, R. Agustí, Universitat Politècnica de Catalunya, Spain.</i>                                 |            |
| <b>5. MEMO: A Generalized Platform for Prototyping Electronic Newspapers and Related Services .....</b> | <b>588</b> |
| <i>E. Zeller, ETH Zurich, Switzerland.</i>                                                              |            |
| <i>W. Bock, Anitra Medienprojekte, Germany.</i>                                                         |            |

## Session H1 - Propagation issues

*Chairman: J. B. Andersen, Aalborg University, Denmark.*

|                                                                              |            |
|------------------------------------------------------------------------------|------------|
| <b>1. Advanced Radio Channel Model for Magic WAND .....</b>                  | <b>600</b> |
| <i>B. H. Fleury, U. P. Bernhard, R. Heddergott, ETH Zurich, Switzerland.</i> |            |
| <b>2. Wide-band Wireless Outdoor-Indoor Local Loop Channel Models .....</b>  | <b>608</b> |
| <i>J. Talvitie, I. Oppermann, University of Oulu, Finland.</i>               |            |

|                                                                                                                             |            |
|-----------------------------------------------------------------------------------------------------------------------------|------------|
| <b>3. Characteristics of the 2 GHz Radio Propagation Channel in High Speed Train Environment .....</b>                      | <b>616</b> |
| <i>P. Vainikainen, P. Aikio, R. Gruber, M. Hall, Helsinki University of Technology, Finland.</i>                            |            |
| <i>P. Degauque, M. Lienard, Université des Sciences et Technologies de Lille, France.</i>                                   |            |
| <i>M. Berbineau, M. Szelag, F. Mollet, M. Klingler, INRETS-LEOST, France.</i>                                               |            |
| <i>W. Pirard, ISSeP, Belgium.</i>                                                                                           |            |
| <i>L. Deryck, ULG Institut de Physique, Belgium.</i>                                                                        |            |
| <i>Y. Verolleman, SNCF, France.</i>                                                                                         |            |
| <b>4. Fading and Shadowing Analysis of Mobile Satellite Propagation Channel at 1.5 and 2.2 GHz Using a Helicopter .....</b> | <b>624</b> |
| <i>J. M. Conrat, P. Pajusco, CNET, France.</i>                                                                              |            |

## Session H2 - Wireless access II

*Chairman: C. Evci, Alcatel CIT/MCD, France.*

|                                                                                                               |            |
|---------------------------------------------------------------------------------------------------------------|------------|
| <b>1. Medium Access Control for the MEDIAN System .....</b>                                                   | <b>631</b> |
| <i>F. Delli Priscoli, University of Rome 'La Sapienza', Italy.</i>                                            |            |
| <b>2. Design Principles for a MAC Protocol of an ATM Air Interface .....</b>                                  | <b>639</b> |
| <i>D. Petras, A. Krämling, A. Hettich, Aachen University of Technology, Germany.</i>                          |            |
| <b>3. MASCARA, a MAC Protocol for Wireless ATM .....</b>                                                      | <b>647</b> |
| <i>F. Bauchot, G. Marmigère, Compagnie IBM, France.</i>                                                       |            |
| <i>S. Decrauzat, Institut Eurécom, France.</i>                                                                |            |
| <i>L. Merakos, N. Passas, University of Athens, Greece.</i>                                                   |            |
| <b>4. Channel Coding for Wireless ATM using OFDM .....</b>                                                    | <b>652</b> |
| <i>S. Zeisberg, B. Kull, F. Poegel, P. Pikkarainen, A. Finger, Dresden University of Technology, Germany.</i> |            |

## Session H3 - Mobile applications

*Chairman: A. Martínez, SIESA, Spain.*

|                                                                                                                                                                                                                                                           |            |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------|
| <b>1. Multimedia Applications in a Medical Environment over Wireless ATM .....</b>                                                                                                                                                                        | <b>659</b> |
| <i>A. Kassler, A. Lupper, University of Ulm, Germany.</i>                                                                                                                                                                                                 |            |
| <b>2. Using WWW Services in Mobile Applications .....</b>                                                                                                                                                                                                 | <b>668</b> |
| <i>G. Kerber, A. K. Herm, Fraunhofer Institut für Arbeitswirtschaft und Organisation, Germany.</i>                                                                                                                                                        |            |

| <i>M. Pizarroso, B. Salas, Telefónica I+D, Spain.</i>                                                                                 |            |

|                                                                                                             |     |
|-------------------------------------------------------------------------------------------------------------|-----|
| <b>2. UMTS DDB Optimization: Design Rules for Data Storage Nodes &amp; the Directory Tree Height</b> .....  | 700 |
| <i>J. G. Markoulidakis, E. P. Adamidis, D. F. Tsirkas, National Technical University of Athens, Greece.</i> |     |
| <b>3. Radio Network Planning with Combinatorial Optimization Algorithms</b> .....                           | 707 |
| <i>P. Calégari, F. Guidec, P. Kuonen, EPFL, Switzerland.</i>                                                |     |
| <i>B. Chamaret, S. Ubéda, ENS-Lyon, France.</i>                                                             |     |
| <i>S. Josselin, D. Wagner, TDF-C2R, France.</i>                                                             |     |
| <i>M. Pizarroso, Telefónica I+D, Spain.</i>                                                                 |     |
| <b>4. Advanced Radio Propagation Methodology for the Optimization of Resources in Mobile Systems</b> .....  | 714 |
| <i>P. J. Cullen, D. Moroney, E. Kenny, Trinity College, Ireland.</i>                                        |     |
| <i>J. F. Wagen, Jingming Li, SWISS TELECOM PTT, Switzerland.</i>                                            |     |
| <i>J. M. Coupé, TDF, France.</i>                                                                            |     |

## Session I2 - Evolution towards third generation

*Chairman: R. Swain, R.S.S. Telecom, UK.*

|                                                                                                           |     |
|-----------------------------------------------------------------------------------------------------------|-----|
| <b>1. DECT and B-ISDN Interworking Issues</b> .....                                                       | 721 |
| <i>M. Dybkjaer Holbech, P. Hojgaard Vesturbú, S. Vejgaard-Nielsen, DELTA Danish Electronics, Denmark.</i> |     |
| <b>2. DECT as a UMTS Access Technology</b> .....                                                          | 727 |
| <i>A. Elberse, TELTEC, Ireland.</i>                                                                       |     |
| <b>3. 3rd Generation Architecture - Benefits to Second Generation Mobile Systems</b> .....                | 736 |
| <i>A. Jarvis, Y. Kriaras, D. Richards, Lucent Technologies, UK.</i>                                       |     |
| <b>4. Migration of DECT/GSM Towards UMTS</b> .....                                                        | 743 |
| <i>P. Monogioudis, INTRACOM, Greece.</i>                                                                  |     |
| <i>A. Jarvis, Y. Kriaras, V. Phillips, Lucent Technologies, UK.</i>                                       |     |
| <i>P. Morissey, ALDISCON, Ireland.</i>                                                                    |     |
| <i>N. Faggion, P. Lucas, Gilles Sabatier, GIE COFIRA, France.</i>                                         |     |

## Session I3 - Terminal I

*Chairman: C. Taylor, ERA Technology, UK.*

|                                                                                                        |     |
|--------------------------------------------------------------------------------------------------------|-----|
| <b>1. Flexible Multi-Standard Terminals for 2nd and 3rd Generation Mobile Systems</b> .....            | 750 |
| <i>B. Friedrichs, Bosch Telecom, Germany.</i>                                                          |     |
| <i>R. Karimi, Motorola GSM, UK.</i>                                                                    |     |
| <b>2. An error Tolerant, Scalable Video Stream Encoding and Compression for Mobile Computing</b> ..... | 762 |
| <i>M. Dasen, G. Fankhauser, Computer Engineering and Networks Laboratory, Switzerland.</i>             |     |
| <b>3. Communications in MultiPort</b> .....                                                            | 772 |
| <i>N. Condette, P. Force, P. Mège, Matra Communication, France.</i>                                    |     |
| <i>J. C. Pérez, AEG Radiocomunicaciones, Spain.</i>                                                    |     |
| <b>4. DECT Mobile Terminals for Multi Slot Operation</b> .....                                         | 778 |
| <i>H. Flügel, S. Harder, J. Riechers, W. Weise, Hagenuk Telecom, Germany.</i>                          |     |

## Session J1 - System simulation

*Chairman: R. Agustí, Universitat Politècnica de Catalunya, Spain.*

|                                                                                  |     |
|----------------------------------------------------------------------------------|-----|
| <b>1. Hierarchical Cell Structures for FRAMES Wideband Wireless Access</b> ..... | 785 |
| <i>R. Karlsson, J. Zander, Royal Institute of Technology, Sweden.</i>            |     |
| <b>2. Evaluating Cellular Capacity for FRAMES Multiple Access Options</b> .....  | 792 |
| <i>A. Toskala, S. Hämläinen, Nokia Research Center, Finland.</i>                 |     |
| <i>J. Castro, CSEM, Switzerland.</i>                                             |     |
| <i>H. Olofsson, Ericsson Radio Systems AB, Sweden.</i>                           |     |

|                                                                                                       |            |
|-------------------------------------------------------------------------------------------------------|------------|
| <b>3. Comparison of Different Dynamic Carrier Allocations for third Generation TDMA Systems .....</b> | <b>798</b> |
| <i>O. Fritz, J. F. Santé, GIE COFIRA, France.</i>                                                     |            |
| <i>F. Khan, D. Zeglache, Institut National des Télécommunications, France.</i>                        |            |
| <b>4. A Real Time Emulator for the RAINBOW Demonstrator .....</b>                                     | <b>805</b> |
| <i>F. Casadevall, R. Agustí, Universitat Politècnica de Catalunya, Spain.</i>                         |            |
| <i>I. Berberana, A. Becerra, Telefónica I+D, Spain.</i>                                               |            |

## Session J2 - Support of mobility

*Chairman: S. Sykas, NTUA, Greece.*

|                                                                                                                                              |            |
|----------------------------------------------------------------------------------------------------------------------------------------------|------------|
| <b>1. UMTS Architectures for the Support of UPT in UMTS .....</b>                                                                            | <b>811</b> |
| <i>C. Morris, J. Nelson, University of Limerick, Ireland.</i>                                                                                |            |
| <b>2. User Mobility Model for an Indoor Environment .....</b>                                                                                | <b>821</b> |
| <i>T. Bregenzer, Institute for Communications Technology, Germany.</i>                                                                       |            |
| <b>3. Roaming Between GSM and Wireless LAN .....</b>                                                                                         | <b>828</b> |
| <i>J. Meggers, A. S. Park, Aachen University of Technology, Germany.</i>                                                                     |            |
| <i>R. Ludwig, Ericsson Eurolab Deutschland, Germany.</i>                                                                                     |            |
| <b>4. Mobility Control Plane for COBUCO .....</b>                                                                                            | <b>835</b> |
| <i>E. P. Adamidis, Y. I. Manolessos, J. G. Markoulidakis, M. E. Theologou, E. D. Sykas, National Technical University of Athens, Greece.</i> |            |

## Session J3 - Terminals II

*Chairman: D. Lappe, R. Bosch, Germany.*

|                                                                                                   |            |
|---------------------------------------------------------------------------------------------------|------------|
| <b>1. Multimedia Environment for Mobiles Terminal technology and Transmission .....</b>           | <b>842</b> |
| <i>M. Unbehaun, Robert Bosch, Germany.</i>                                                        |            |
| <b>2. The MoMuSys Mobile Multimedia Terminal .....</b>                                            | <b>850</b> |
| <i>A.J. Pearmain, J. Cosmas, A. Carvalho, P. Sheldon, Queen Mary &amp; Westfield College, UK.</i> |            |
| <i>M. Bilodeau, Centre De Morphologie Mathématique, France.</i>                                   |            |
| <i>F. Connor, Teltec, Ireland.</i>                                                                |            |
| <i>F. Mundt, Robert Bosch, Germany.</i>                                                           |            |
| <i>S. Panis, Siemens AG, Germany.</i>                                                             |            |
| <i>G. Zimmer, FhG IIS, Germany.</i>                                                               |            |
| <i>S. Lemaire, J-C. Schmidt, CNET, France.</i>                                                    |            |
| <b>3. Advanced Video Coding Scheme for Low Bit Rate Applications .....</b>                        | <b>857</b> |
| <i>L. Öktem, M. Karczewicz, J. Nieweglowski, Nokia Research Center, Finland.</i>                  |            |
